Thomas Tritsch

PENTAGON

DESIGN THOMAS TRITSCH / 2007

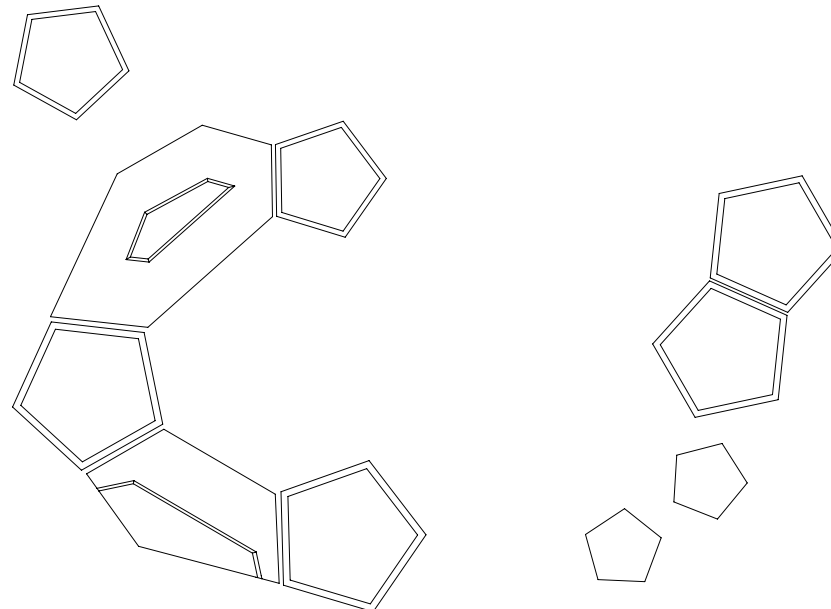

Don't think one, think five! In his design Thomas Tritsch underlines the sturdy form of the mathematical figure existing out of five corners. Inspired by medieval fortresses proved well-fortified when built as a pentagon. The result is a broad collection combining different materials: oak wood, qm foam or upholstery in several pieces or in one single piece. Put the modular collection together in multiple variations and discover its numerous possibilities.

» ITEMS AVAILABLE UPHOLSTERED IN LEATHER AND FABRIC

» CUSTOM COLORS OR SIZES AVAILABLE UPON REQUEST

TRY IT YOURSELF!

The loose cushions or wooden table tops of the pentagonal and hexagonal shapes fit in a 4x4 cm edge of the base. The several sofas, the hexagonal shape and the linking piece create practically innumerable possibilities to create compositions, going in special curves, circles or also straight lines. Everything is possible. Try it yourself!
