MDF

**De basis van de Stylepads is zwart MDF:
Type MDF-HLS volgens EN 622-5.**

Het MDF wordt gebruikt in serviceklasse 2 (beperkingen in temperatuur en omringende luchtvochtigheid) en kan worden gebruikt in biologische risicoklassen 1 en 2 van EN 335-3.

De Stylepad zal optimaal beschermd moeten worden tegen elk direct contact met water. Het MDF is onderhevig aan minimale uitzetting en zwelling in een zeer vochtige omgeving.

Het MDF van onze Stylepads heeft een lage formaldehyde-emissie (klasse E1) en wordt geleverd met PEFC-, FSC- of FSC Controlled Wood certificaat.

Speciale toepassingen:

Op aanvraag kunnen we de Stylepads brandvertragend of vochtwerend maken.

MVO

Onze Stylepads en bijbehorende Functionals lenen zich uitstekend voor circulair ondernemen. Ons concept zorgt vanwege het 'ontkoppelbare' karakter voor maximale flexibiliteit en mogelijkheid tot hergebruik. Mocht een Stylepad of het systeem kapot zijn, dan hoeft slechts dat deel vervangen te worden. Het ophangstelsel is van een duurzaam ABS, dus kan makkelijk een tweede leven aan.

MDF

Het MDF is een duurzame materiaalkeuze en betrekken we van de meest duurzame leverancier. Het hout is afkomstig van Europese bossen. Qua CO₂ voetafdruk is ons MDF een prima keuze: de platen die wij gebruiken, bestaan voor 80% uit houtsnippen. In feite vormen de platen een opslag van CO₂ en helpen ze klimaatverandering te verminderen. Dankzij ons retoursysteem krijgen de onbeschadigde MDF-platen een tweede leven. En tenslotte zijn MDF-platen oneindig te versnipperen en blijven ze dus in de grondstoffencirkel.

BERBER
BV

Voor de benodigde retourstroom werken we nu al samen met Berber, een fijn bedrijf dat al onze afvalstromen scheidt ten behoeve van maximaal hergebruik. Een aantal mensen met achterstand tot de arbeidsmarkt hebben bij dit bedrijf een baan gekregen.

NE DistriService

Voor het transport naar de klant schakelen we onze duurzame en betrouwbare partner NE DistriService in.
