ABOUT A CHAIR

Design by/
Hee Welling

The idea behind the About A Chair-collection has been to develop a chair with conspicuous simplicity. A chair which works just as well around the dining table as around a conference table, in a canteen or at the office. The ambition of designer Hee Welling has been to reach a higher level in the combination of form, function, comfort, detail and aesthetics.

About A Chair is the product of close collaboration between Hee Welling and HAY aspiring to create a family of chairs where all shells and frames can be combined – but without letting the perfection in each single model lose ground to diversity.

About A Chair 08 (AAC08)

DESIGN BY Hee Welling for HAY

About a Chair has an open frame construction in bent steel that brings added lightness to the intuitive design. The shell is round and upright at the same time and combines a high degree of seating comfort with an inviting expression. The open frame is available in stainless steel as well as a black or white powder-coating, which lets you design contrast-rich colour combinations of frame and seat. The many possible combinations of frame, shell and colours make About a Chair an ultra-flexible and widely useful chair that celebrates individuality.

About A Chair 10 (AAC10)

DESIGN BY Hee Welling for HAY

AAC 10 - Swivel base/no armrest

This version of About a Chair has a swivel base in powder-coated steel, which gives the chair a slicker look. Both because the wooden frame has been replaced with steel and because the delicate and elegant legs fan out from the centred base, almost standing on tiptoes and optically raising the chair off the floor. In this open version, the seat invites you to sit down for an informal break – in a private or professional context.

About A Chair 12 (AAC12)

DESIGN BY Hee Welling for HAY

About a Chair is an intuitive take on the concept of a chair. The organic posture provides good lumbar support, while the open shell invites you to take a seat. About a Chair comes in a dyed plastic version as well as a version with either frontal or full upholstery in hard-wearing furniture fabrics combined with round legs in soap-finished or lacquered oak or ash wood stained black. The many possible combinations of frame, shell and colours make About a Chair an ultra-flexible and widely useful chair that celebrates individuality.

AAC 12 - Wood base/without armrest

About A Chair 14 (AAC 14)

DESIGN BY Hee Welling for HAY

AAC 14 - Wheel frame/without armrest

Here, About a Chair serves as the perfect office chair, bringing a warm and welcoming feel to an otherwise rather cool and technical genre. The chair uses the same simple and familiar shell, while the elegant steel frame acquires a narrative charm when it is combined with the spherical castors. This version of About a Chair is perfect for official settings and an obvious choice for both large-scale corporate contexts and work-at-home offices – or maybe a dining chair? That could rewrite the concept of ‘meals on wheels’!

About A Chair 16 (AAC 16)

DESIGN BY Hee Welling for HAY

The four-legged About a Chair is the stackable wonder of the series. The four legs slip under the seat in a rounded angle and frame the upright and organic posture of the shell which is equal parts seating comfort and friendly embrace. The four legs are available in chrome as well as a black or white powder-coating, which lets you design contrast-rich colour combinations of frame and seat. The many possible combinations of frame, shell and colours make About a Chair an ultra-flexible and widely useful chair that celebrates individuality.

About A Chair 18 (AAC 18)

DESIGN BY Hee Welling for HAY

This slightly more formal version of About a Chair features elegant legs and armrests that virtually frame the seat shell for a secure and comfortable feel. The chair's upright and organic posture offers good lumbar support, while the open front invites you in. In this version, About a Chair is a perfect conference chair, but it has retained a stylish sense of homeliness that makes it fit right in around a dinner table or in a work-at-home office.

About A Chair 20 (AAC 20)

DESIGN BY Hee Welling for HAY

AAC 20 - Swivel base/with armrest

This version of About a Chair has a swivel base in powder-coated steel, which gives the chair a slicker look. Both because the wooden frame has been replaced with steel and because the delicate and elegant legs fan out from the centred base, almost standing on tiptoes and optically raising the chair off the floor. The rounded shell embraces and supports and invites you to lean back and take a break.

About A Chair 22 (AAC22)

DESIGN BY Hee Welling for HAY

This curvy version of About a Chair is designed to be supportive, so you can just sit back and let the chair do the work. About a Chair offers a warm embrace, and the distinctive design gives it a unique expression. This version is available with three upholstery options: full upholstery of the whole shell, upholstery on the front of the rounded shell or a seat cushion. All three versions create a wow-effect when you see how much the expression changes with the relatively simple variations in upholstery, which of course owes a great deal to fabric textures and colours.

About A Chair 24 (AAC 24)

DESIGN BY Hee Welling for HAY

AAC 24 - Wheel frame/with armrest

About a Chair as an office chair clearly means business. The rounded shell adds executive weight to the chair – suggesting that it takes a person of a certain potential to claim this seat. The office chair version manages to bring a warm and welcoming feel to an otherwise rather cool and technical genre – perhaps because the castors lend the elegant industrial steel frame a narrative charm? About a Chair is perfect for official settings and an obvious choice for both large-scale corporate contexts and work-at-home offices – or maybe as a dining chair? That could rewrite the concept of ‘meals on wheels’!

About A Chair Low 42 (AAC 42)

DESIGN BY Hee Welling for HAY

AAC LOW 42 - Wood base/with armrest

The low back on About a Lounge Chair offers perfect support, a strong expression and well-balanced proportions as well as the flexibility of the steel swivel base. At first glance, About a Lounge Chair may appear somewhat formal and targeted to the contract market, but nevertheless it would fit right into most private homes. About a Lounge Chair has a sculptural appearance in the room with its beautiful back, where the stitching helps define graphic lines that are subtle or striking, depending on your choice of upholstery.
