

DUM

collection

Wiebe Boonstra and Marc van Nederpelt are the men behind Amsterdam-based furniture brand DUM. Their chairs, tables, stools and armchairs are used to create contemporary workplaces.

DUM's sustainable furniture comes in vivid colours and is usually slightly oversized, with a robust, solid feel. It's a style that is perfectly suited to large spaces and buildings. Spaces come to life, people connect, and ideas are born.

The popular, well-priced DUM desks are available in lengths up to eight metres: an idea inspired by (design) studios where people collaborate on large tables. The collection also features large, long and circular standing tables, as well as privacy chairs. These allow for variation and the creation of a healthier working environment.

DUM furniture can already be found at the offices of organisations including Universal Music, Booking.com, Obvion, the Dutch Ministry of Foreign Affairs, Amazon, Philips, DSM, Frame Magazine, Wageningen University & Research, TNO, BDO Accountants, Yacht and BNN-VARA.

Beech wood is used for the majority of DUM's pieces. This sustainable, hard timber is perfect for bending and use in furniture making. The wood is grown in sustainable, managed forests in neighbouring countries. In these forests, more trees are always planted than are chopped down.

DUM's furniture is produced in the east of the Netherlands, where modern techniques are combined with traditional crafts. To upholster their pieces, DUM has selected unique, knitted textiles produced by FEBRIK in Tilburg. DUM has created a local production chain that not only contributes to reducing its CO2 footprint, but also enables it to quickly cater to clients' individual wishes.

We are delighted to celebrate the coming of the large Beech Board boardroom tables, the new four-legged Beech Boy stool, the quirky Beech Club chair and the restrained Beech Cabin. All hail the Beech!

The Beech Connect and Beech Basics table program is now even cleaner and simpler. While offering you even more options. Choose your favorite.

beech board

The Beech Board comes into its own in boardrooms, at the heart of the company where decisions are made and courses set. The Beech Board is a spacious table featuring a solid wooden top. It's an impressive 140 or 160 cm wide, so there's plenty of room to work on both sides of the table.

The Beech Board is available in five lengths as well as in five stained semigloss finishes. The unstained version steals the show with its natural blonde beech colour. And the space in the middle? That subtly helps remove unsightly cables from view...

beech cabin

beech board

beech connect 71

Beech Connect is a super flexible table system based on the sturdy three legged Beech frames. It may serve as a desk in a flexible workspace, as an impressive - almost 8 meter long - canteen table or as a simple elegant round table.

Beech Connect comes in al large variety of sizes, materials and colours, to create a long canteen table or a big round standing table. The Beech Connect 71 is available as 160cm wide tables, creating big workplaces head to head.

Beech Connect comes in two heights; 74 and 103 cm to create a huge range of round and rectangular tables or standing tables.

beech connect round 100

beech connect rectangle

beech connect 71 rectangle

beech basics 100

beech basics 71

Beech Basics are tables with the unmistakable sturdy look of four big round table legs can be effortlessly combined with Beech Connect. Ideal for canteens, conference rooms or restaurants.

Rectangular and square tables of 100, 160, 200 and 260cm tall in several widths.

vara bnn vpro nos

beech chair

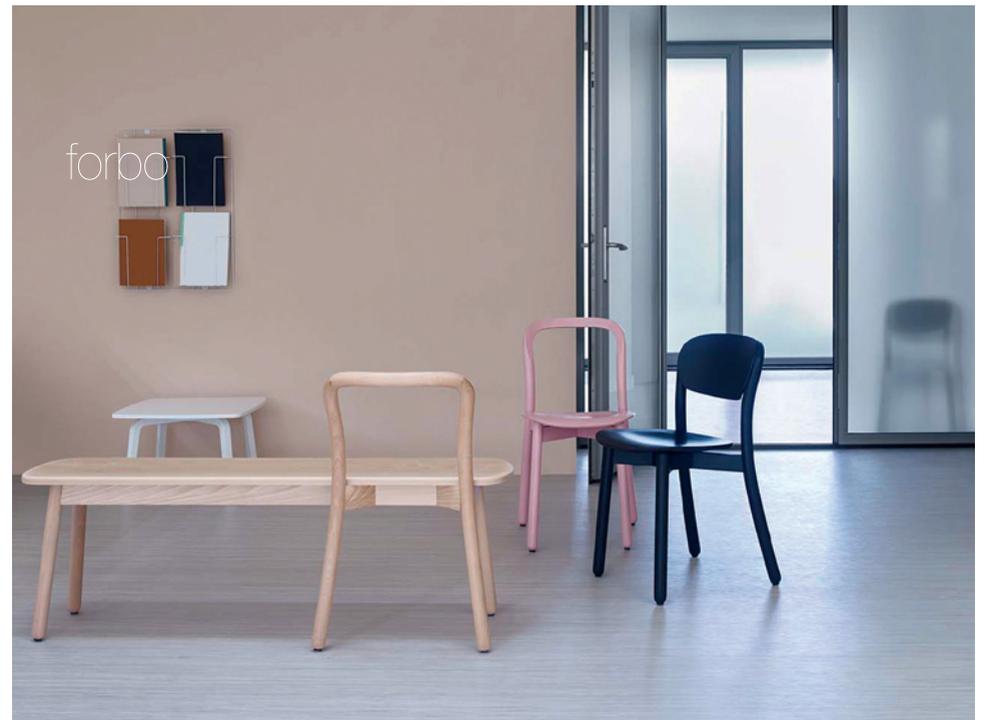

The Beech Chair is made from bended wood, has a refined backrest and a seemingly floating seat. The chair comes with a closed or open backrest, both surprisingly comfortable.

beech chair

beech chair open: BEC-NAT / BLK / FAL3035 / FAL3015
beech chair back: BEC-NAT / BLK / FAL3035 / FAL3015

beech stool

Beech Stool is a three-legged solid wooden stool with a steel footrest. Subtle details such as a seemingly floating seat and rounded legs make this bar stool elegant and refined. Also available with back rests in two variations for exiting mix & match combinations.

beech boy

Beech Boys love taking a place at the bar, but they are just as happy at a standing desk in a modern office. The Beech Boy is a robust, stable four-legged stool with an ergonomic seat and steel footrest. The stool is also available with a backrest, offering additional comfort during longer sittings.

beech boy

beech bench

The Beech Bench has the refined and comfortable backrest of the Beech Chair. A special kind of furniture which has a home in many places. The Bench comes with or without a backrest.

beech bench backrest left: BBL (RAL 1018)
beech bench: BEE (natural)

beech side

Beech Side is a small handy side table matching with all the other Beech items. Made from solid turned wood the Beech Side looks like a funny giant chess piece.

beech side low: BSL (RAL 1018 / stain PAL 2065)
beech side high: BSH (natural / stain PAL 010)

beech cabin

The Beech Cabin is a sturdy cupboard with elegant door handles and a quirky frame. The two-metre wide cupboard is available in two heights: with two or three compartments.

The Beech Cabin comes in the same stain colours as the Beech Board. Together, they certainly make an attractive couple.

beech private

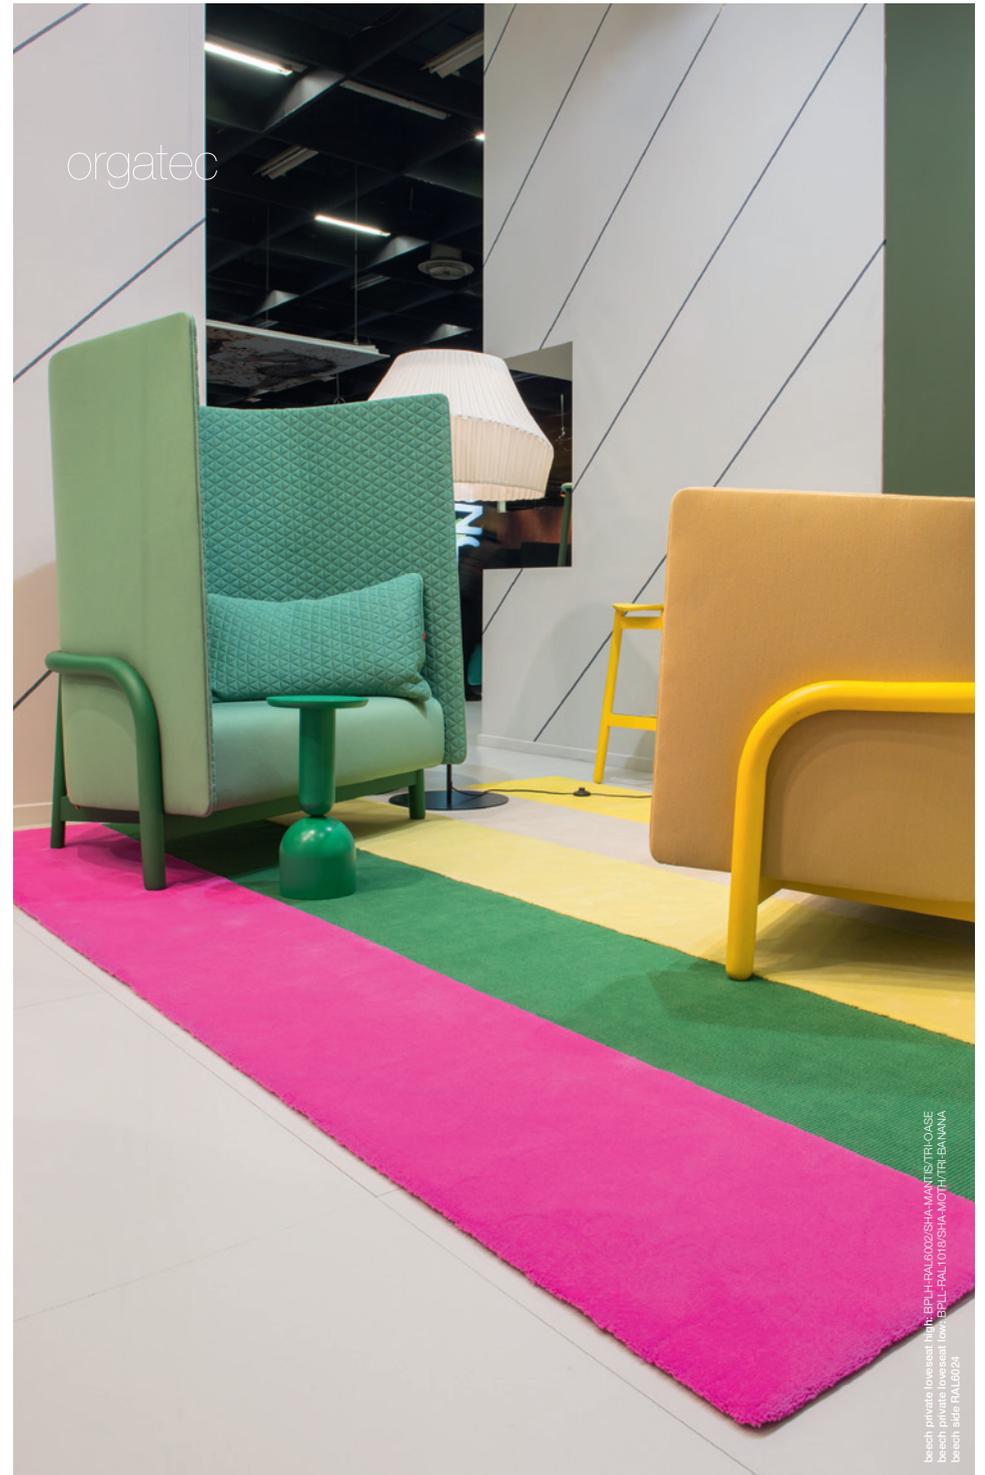

beech private: SAL001, SH-rodur-TFL-swamp
beech boy: EBO73 (mat black)
beech connect: COO100 (mat black)

beech private

Beech Private series was designed for breakout areas in an office environment or relaxation in home interiors. With its comfortable seats, goose feathered cushions and backrest upholstery the Beech Private creates a cosy shelter in open public space to make a telephone call, have a social meeting or just relax.

beech club

The Beech Club is a true eye-catcher. Perhaps thanks to her exquisite curves, which are further emphasised by the wide bordering. Soft and comforting, she is the perfect place to recline. Whether you choose a ton sur ton version or prefer attractive contrasting upholstery, there's always plenty of life at the Beech Club.

And there's also a Beech Club Bench, offering ample space for a productive tête-a-tête. Welcome to the Beech Club, where everyone's an honorary member.

beech club

DUM

panatella

Like the name suggests this armchair is for relaxing. The curved armrests, the soft varnished wood endows this piece a soothing touch. Comfort is maximized through the use of goose down in the upholstery.

46

47

wagner easy

The open and informal design of Wagner Easy creates a spacious and friendly feel. Wagner Easy is upholstered with Febrik knitted fabrics. The Wagner is made from solid beech wood and available in many striking colours. Comfort is maximized through the use of goose down in the upholstery.

unkle+ UNK (DIV 0223)

unkle+

The renewed classic Unkle+ easy chair system. More flexible and affordable than ever before. But its classic features still remain; oversized, playful and relaxed with minimal detailing. Perfect for large spaces and big impact. Available in any width with incremental steps of 30cm. So it fits in every space or project you have in mind. Start creating your own super long bench or cosy love seat.

Purchased by the Stedelijk Museum Amsterdam

usg people

delay

Somewhere in between a bench and a chaise longue for short or long stays. Designed for comfortably lying down (Delay) and carefree sitting up (Short Delay).

stripes

Stripes is a carpet-system in a range of 10 colours in 100% New Zealand wool designed by Fransje Killaars. Available in 55 colour combinations in almost any size. Each stripe measures 49 cm. With 10 colours the maximum width is 490 cm. All you have to do is select your favorite range of colour numbers and the desired length. Each carpet is fitted with an anti-slip backing and blind finished with cotton border.

cassius

A leather punching bag. To let off steam, work out or simply look at. Handmade with supreme eco leather and strong stitching. Cotton filling, 1.50 meter and 50 kilograms. An essential for every office, waitingroom or public space.

private residential amsterdam

dum on the move

pleat

After many years being part of the DUM collection, the Pleat lamps have found a better home at Hollandsicht. Hollandsicht is a specialized brand in iconic Dutch lighting. Also the King Arthur of Jesse Visser is now part of this collection. Please visit hollandsicht.eu for more information.

Yellow

In the beginning
Oh, long before that

When light was deciding
Who should be in
And who should be out
Of the spectrum
Yellow was in trouble

Even then it seems that Green
(you know how Green can be)
Didn't want Yellow in
Some silly primal envy I suppose
But for whatever cause
The effect was bad on Yellow
And caused Yellow to weep yellow tears
For several eternal
Before there were years

Until Blue heard what was up
Between Green and Yellow
And took Green aside for a serious talk
In which Blue pointed out
That if Yellow and Blue were to get together
Not that they would but if they did
(a gentle threat)
They could make their own green
"Ohhh" said Green with some understanding
Naturally by a sudden change of hue
Green saw the light and Yellow got in
It worked out fine
Yellow got lemons
And green got limes

care and maintenance

Our products are manufactured from materials of the highest quality. With utmost care we check the goods before they leave our factory, so the product quality can be guaranteed.

HPL and melamine (tabletops)

HPL and Melamine is a material that can withstand scratches and high temperatures. The surface is smooth and non-porous, which makes it hygienic and easy to keep clean. Clean daily with a damp cloth.

Be careful with hot objects. Always use a trivet when hot objects are placed on the blade. Sharp objects can cause scratches. If it is prolonged too close to a heat source, the risk that the warmth penetrates into the underlying material, which is usually much more sensitive to prolonged heat.

It needs no special care. It's easy to clean. Never use (liquid) abrasives or scouring pads. Normal, everyday dirt can be removed with a soft, damp cloth. Remove dirt and stains preferably immediately. More stubborn stains and dried-on residue can be removed with a mild detergent solution or usually mild (non-abrasive) household cleaning. When cleaning the mildest possible means should be used. In particular, you should not use products containing abrasives. This will leave scratch marks, or make the material dull. Possible residues of cleaning products removed with clean water, after which the material is again nice glossy with a dry with a clean cloth. Please read the instructions by Pfeiderer / Duropal; https://www.pfeiderer.com/product_assets/PDF/6/36/036/IM0014036.PDF

HPL Arpa Fenix (tabletops)

Arpa Fenix is a 'smart material' which is designed for interior applications. The unique features of Arpa Fenix are due to the top layer. It features a nanotech coating that ensures that the surface feels silky smooth. It is extremely mat and does not reflect. The colour therefore never disappears. Another advantage of this is that there are no fingerprints are visible.

The most unusual feature of Arpa Fenix is the ability to repair minor scratches through heat.

Please read the instructions by Arpa Fenix;

<http://www.fenixforinteriors.com/sites/all/themes/fenixfi/script/downloadFile.php?fid=539>

wood products (solid / veneered)

No single wooden product is the same. Wood is a natural product and has many features like texture and colour which varies per product. Wood will discolour by artificial or sunlight. The wood will always discolour, but this will be the worst when placed in direct sunlight. Also, the timber will always work by change in temperature and humidity, this is inherent to the natural properties of the product. This process will create open joints. In order to minimize this, it is best to maintain a temperature between 15°C and 24°C and an air humidity between 40% and 60%. Place the product not too close to a heat source to avoid cracking of the wood as much as possible.

Use on tables always coasters with felt to prevent damage and discolouration. Never place hot objects directly on your wood product this may cause stains which are impossible to remove. The first two months the paint is not yet fully hardened. Avoid heavy load such as vases.

To clean wood and keep it in good condition, we recommend to clean the wood surface with a damp, soft cloth and rub with a soft dry cloth. For cleaning always a clean white cloth.

upholstered product (fabric)

We have selected only for our collections substances of high quality. The characteristics of substance such as rack, pilling, fading and dirt repellency are different for all substances. The fabrics from our collection contain natural fibers may become discoloured by artificial or natural light. Cotton fabrics for this are more sensitive than wool fabrics. Generally discolour light fabrics less than dark colours. It is best to direct sunlight on your products to minimize. Perspiration or grease from skin or hair comes into contact with the substance can cause stains, including medication use can cause reactions.

Clean the upholstered product preferably only with a damp, clean white cloth and rub never hard about the mater. Furthermore, it is important to clean your upholstered products regularly with the soft nozzle of a vacuum cleaner so that the fabric between the fibers do not accumulate.

For knitted fabrics of Febrik please read the instructions by Febrik.

https://www.febrik.com/files/25/221217_MAINTENANCE&CARE.pdf

For the woven Kvadrat fabrics please read the instructions by Kvadrat.

<https://Kvadrat.dk/download/media/download-section/relatedfiles/Kvadrat-maintenance-manual-2016-uk.pdf>

upholstered product (leather)

Leather is a natural product which has a very lively and warm appearance. It will discolour by artificial or sunlight or by placement near a heater or radiator. Generally lighter colours fade less than dark colours. It is best to avoid direct sunlight as much as possible and not too close to a heat source such as stove, fireplace or radiator places. Shine or dark spots can occur in places where there is a lot of contact. Perspiration or grease from skin or hair comes into contact with the leather can cause stains, use medications can cause reactions.

The processed leathers by us are of a high quality. Leather is a natural product and there are always some natural features present. These features emphasize the authenticity of the leather, this can include scarring, structural differences are insect bites or neck folds.

While the use of leather-wrapped products any wrinkles may occur in the leather. This is due to the natural stretch that is present in the leather and can not be prevented.

steel / aluminum

Steel and aluminum have a very robust and technical appearance. It does not require special care. It's easy to clean. Never use (liquid) abrasives or scouring pads. Normal, everyday dirt can be removed with a soft, damp cloth. Remove dirt and stains preferably immediately. More stubborn stains and dried-on residue can be removed with a wrung microfiber cloth. Use mild soap or usually mild (non-abrasive) household cleaning. No means use products containing abrasives. Make the material spotless with a dry clean cloth .

wool (carpet)

Wool is a warm and natural product and will discolour by artificial or sunlight or by placement near a heater or radiator. Generally lighter colours fade less than dark colours. It is best to avoid direct sunlight as much as possible and not too close to a heat source such as stove, fireplace, or radiator.

For wool please read the instructions of Wools of New Zealand.
