Description

We've been looking for inspiration for a new dining table for a long time and the idea came with the design of the PLAY coffee tables.

There has never been a more logical time to create a contemporary dining table from solid wood, than in this era when wood is once again modern.

At the same time, this enduring retro trend inspired us to pay tribute to the design of the 50s, this time with PLAY dinner. We are launching the table in two shapes, a round shape and a Lamé curve inspired by its inventor, the French mathematician, Gabriel Lamé.

Construction

The 18mm thin solid wooden tabletop is cut and hand polished leaving a plate, with a smooth and comfortable edge. Combined with the turned wooden legs they create a light and elegant coffee table. As an alternative the tables are available with table plates in white laminate.

Designers

A vision to create qualitative, functional and timeless furniture made Jacob Munch and Henrik Bruun establish their design company bruunmunch in 2011. Since the duo took the Danish design scene, everything went fast. Their vision at the time and today is creating new design in close cooperation with designers, Danish suppliers and skilled cabinetmakers. Bruunmunchs furniture is Danish in expression, design and production.

All products are manufactured in Denmark and comes with a 5 year warranty.
