Fabrics & Finishes collection by Satelliet

In front of you is the Fabrics & Finishes book of Satelliet Meubelen. We create hospitality furniture and believe that every project is unique and deserves a personal touch. With this book we would like to guide you through our house fabric collection and the different options in materials and finishes when it comes to our table tops. Let yourself be informed – but most of all inspired – and find the right match for your project.

#24 FADE

De Fade is een Jacquards geweven stof met een subtiel en tijdloos patroon. Jacquards betekent dat twee garengroepen haaks op elkaar staan, waar chenille garen in de stof wordt geweven. Dit geeft de stof een stevig, zacht en vol gevoel en aspect. Vanwege het chenille garen is er kans op een zitspiegel.

Fade is a Jacquard woven fabric with a subtle and timeless pattern. This Jacquard fabric is highly textured with two types of threads which are positioned perpendicular to each other and have chenille threads woven in between. It gives the fabric a firm, soft and full grip and feel. Because of the chenille threads a seat shimmer can develop.

Composition	100% Polyester
Martindale	40.000
Colourfastness to light	5
Flammability	BS 5852 Cigarette test

#26 BISON

De Bison is een microvezelstof met een ruige en vintage uitstraling en is zowel in kleur als in natuurlijke tinten te verkrijgen. De gebruikte productietechniek maakt dit een uiterst stevige stof en geeft het een prettig en zacht gevoel. De backing zorgt voor extra kwaliteit maar door minimale rek is de stof minder goed toepasbaar op ronde vormen. Wél is deze waterafstotend en vlekwerend.

Bison is a microfibre fabric with a robust and vintage look and is available in bright colours as well as natural shades. The manufacturing production technique makes it a very firm fabric with a nice and soft touch. The added backing provides extra quality but because of minimal elasticity it's less suitable for round shapes. It is however water and stain-resistant.

Composition	100% polyester
Martindale	20.000
Colourfastness to light	4
Flammability	BS 5852 Cigarette test

FINISHES
WOOD COLOURS

Al onze massief houten tafelbladen kunnen in diverse Satelliet houtkleuren gebeitst worden. Naast deze houtkleuren zijn er ook een aantal trendy Satelliet kleuren mogelijk.
De tafelbladen worden na het beitsen afgelakt met een 2 componenten polyurethaanlak.
Dit ter bescherming tegen vocht en alcohol.

All our solid wood table tops can be stained in a range of standard Satelliet wood stains. As well as these wood stains, there are also other on-trend colour options available. After staining, the table tops are lacquered with a two component polyurethane enamel. This for protection against moisture and alcohol.

OUTDOOR COLLECTION

RESYSTA

Resysta is een innovatief en duurzaam materiaal wat gemaakt wordt van biologisch restafval. Het materiaal beschikt over de look en feel van hout en de voordelen van kunststof. Dit maakt het bij uitstek geschikt voor toepassing in terrasmeubilair.
Resysta is an innovative and sustainable material made from organic residual waste. The material has the look and feel of wood and the advantages of plastic. This makes it ideal for outdoor furniture.

TEAK

Teak is de meest geschikte houtsoort wat onbehandeld buiten toegepast kan worden. Door de eigenschappen en kleur heeft het een zeer hoge natuurlijke look en feel. Teak kan naar wens ook geolied worden waardoor het een rijke goudgele look krijgt.
Teak is the most suitable wood which can be used untreated for outdoor use. Because of its characteristics and colour, it has a very natural look and feel. Teak can be oiled if preferred which gives it a rich gold-yellow look.

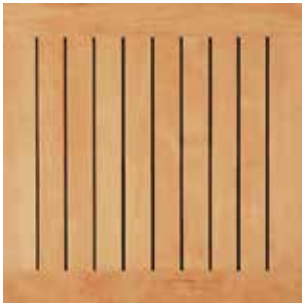

ALUMINIUM

Aluminium Is uitermate geschikt voor outdoor gebruik en in diverse uitvoeringen leverbaar. Aluminium bladen zijn in een dunne uitvoering leverbaar en hebben daardoor een moderne look en feel.
Aluminium is exceptionally suitable for outdoor use and is available in various designs. Aluminium tops are available with a slim thickness which gives them a really modern look and feel.

PRINT COLLECTION

BY SATELLIET

Printen van stof en kunstleder in een persoonlijk gekozen kleur of patroon.
Printing fabric and imitation leather in a personally chosen colour or pattern.

Het is mogelijk om je eigen patroon of kleur te drukken op 3 verschillende stoffen en een kunstleder. Dit sluit aan op de toenemende vraag naar het personaliseren van producten. De gewenste kleur kan worden verkregen door opgave RAL kleurnummer of een ingestuurde kleurstaal. Om je eigen patroon te laten printen kan er vanuit Shutterstock.com een naadloos patroon worden aangeleverd.

It is possible to print your own pattern or colour on 3 different fabrics and an artificial leather. This is in line with the increasing demand for personalizing products. The desired colour can be obtained by specifying RAL colour number or a submitted colour sample. To have your own fabric printed, a seamless vector file pattern can be supplied from Shutterstock.com.

Stof
Cord: mat velours kwaliteit
Crystal: glans velours kwaliteit
Fiber: stof met een geweven uitstraling

Kunstleder
Strike: kunstleder met krasvaste PU coating

Fabric
Cord: mat velvet quality
Crystal: shine velvet quality
Fiber: fabric with a woven look

Artificial leather
Strike: artificial leather with scratch-resistant PU coating

Al deze stoffen hebben een vuil- en waterafstotende finish. Belangrijk is dat het kunstleder niet in effen kleur te drukken is, maar dat dit altijd een gemêleerde uitstraling heeft gebaseerd op een uni opgegeven kleur. Op aanvraag en vanaf 100 meter zijn de stoffen brandvertragend te maken tegen een meerprijs. De minimale order voor de stoffen is 40 meter en voor kunstleder 30 meter. Het is mogelijk meerdere patronen of uni kleuren te drukken op 1 rol om aan je métrage te komen.

All these fabrics have a dirt and water repellent finish. It is important to know that the imitation leather can not be printed in solid colour, it will have a mixed look based on a uni specified colour. On request and from 100 meters the fabrics can be made fire-retardant at an additional cost. The minimum order for the fabrics is 40 meters and for artificial leather 30 meters. It is possible to print multiple patterns or uni colours on 1 roll to get to the required number of meters.

Werkwijze
Method

STEP 1

Lever een RAL-nummer, een referentiestaal van een kleur of een naadloos vectorbestand aan.

Deliver a RAL-number, a reference fabric or a seamless vector file.

STEP 2

Kies een stof uit waarop het patroon gedrukt moet worden: Cord, Crystal, Fiber of Strike.

Choose a fabric on which the pattern needs to be printed: Cord, Crystal, Fiber or Strike.

STEP 3

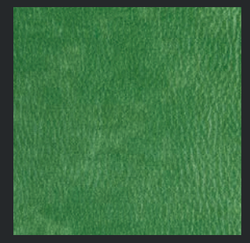

Er wordt een A4 staal met patroon toegestuurd voor goedkeuring.

An A4-size sample with pattern will be sent for approval.

Colour variations possible.

SUSTAINABLE COLLECTION

BY SATELLIET

Ook in de herkomst van onze stoffen wordt steeds meer rekening gehouden met duurzaamheid. Het mooie hiervan is dat de mogelijkheden met betrekking tot duurzaamheid zich op verschillende manieren voordoen. Zo vindt recycling plaats vóór en na consumptie en/of worden er alleen grondstoffen gebruikt die later ook weer opnieuw als grondstof kunnen worden gebruikt. Deze drie manieren staan ook wel bekend als: Pre-consumer recycling, post-consumer recycling en Cradle 2 Cradle.

Sustainability is becoming increasingly important, and in particular the origin of our fabrics. There are a number of Recycling processes which involves 3 main steps, which form a circle or loop. They are: Pre-consumer recycling, post-consumer recycling and Cradle 2 Cradle.

Pre-consumer recycling

Pre-consumer recycling is de terugwinning van afvalstoffen die zijn ontstaan tijdens het productieproces, of tijdens de levering van goederen nog voordat deze aan een consument werden geleverd.

Pre-consumer gerecyclede materialen kunnen worden opgesplitst en opnieuw worden gemaakt tot soortgelijke of verschillende materialen, of ze kunnen worden verkocht “zoals ze zijn” aan externe kopers die deze materialen vervolgens gebruiken voor consumentenproducten.

Bijvoorbeeld bij het weven van stoffen. Vezels vallen tijdens het weven van de machine af, en deze worden nu weer gesponnen tot nieuwe garens in plaats van weggegooid.

Pre-consumer recycling

Pre-consumer recycling is the recovery of waste materials created during the production process, or during the delivery of goods prior to their delivery to a consumer.

Pre -consumer materials can be the remnants that end up on the factory floor which can be repurposed into something new rather than be thrown away.

Post-consumer recycling (PCR)

Post-consumer recycled (PCR) producten zijn gemaakt van afval dat is ontstaan bij de eindgebruiker en niet meer gebruikt kan worden in de huidige functie. Post-consumer afval is wereldwijd de grootste afvalstroom en daarom wordt er naar steeds meer manieren gezocht om deze stroom te beperken of te verwerken tot nieuwe producten.

Na gebruik wordt dit afval ingezameld en gerecycled tot een nieuw product. Denk hierbij aan lege shampooflessen, plastic petflesjes etc. Vervolgens worden deze restmaterialen gerecycled tot bijvoorbeeld een meubelstof.

Post-consumer recycling (PCR)

Post-consumer recycled (PCR) products are made of waste materials that are created by the end user and can no longer be used. Worldwide, post-consumer waste is the biggest waste stream, more and more ways are being found to reduce this flow or be able to make it into new products.

After usage, this waste is collected and recycled into a new product. Empty shampoo bottles, PET bottles and other waste materials can be recycled into completely new products such as furniture fabrics.

Cradle 2 Cradle (C2C)

Het Cradle 2 Cradle principe gaat over het behouden van waardevolle grondstoffen vanuit de gedachte: grondstoffen blijven grondstoffen. Zo kunnen alle gekozen materialen na een gebruikersperiode opnieuw worden ingezet in een ander product, en dat eindeloos lang, zonder kwaliteitsverlies. Het gaat in dit concept dan ook niet om het streven naar minder slecht, maar naar meer goed.

Dit circulaire concept zorgt ervoor dat grondstoffen en materialen omgezet worden tot veilige voedingsstoffen die keer op keer kunnen worden hergebruikt. Alles is ontworpen als een grondstof voor iets anders en draagt op die manier een positieve bijdrage aan de wereld van nu en de toekomst.

Cradle 2 Cradle (C2C)

The Cradle 2 Cradle principle mimics the regenerative cycle of nature in which waste is reused. In nature when a tree or animal dies or creates waste, that waste breaks down and becomes nutrients for another process.

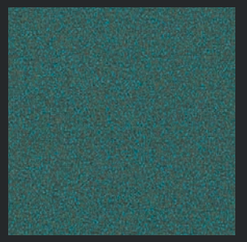

This cyclical concept makes sure that raw materials are converted into safe materials that can be re-used time and time again. Everything is created as a raw material to be used for something else and in that way makes a positive contribution to the world and the future.

GLASS COLLECTION

BY SATELLIET

Glazen bladen met een houten of metalen rand
Glass table tops with a wooden or metal edge

Deze bladen worden opgebouwd uit een MDF kern in combinatie met een gehard glazen blad dat voorzien wordt van een (gepersonaliseerde) print. De print wordt door middel van verhitting aan de onderzijde in het glas geprint en heeft hierdoor een langere levensduur. Gehard glas is overigens thermisch behandeld. Hierdoor krijgt het glas zijn speciale eigenschappen en ontstaat in het glas een permanente spanningsverdeling. Het glas is dus niet harder, maar wel sterker en veiliger. Bij een eventuele breuk barst het in kleine stukjes en niet in scherven. Ook is het glas uitermate vlekbestendig.

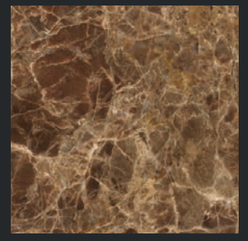

De randen worden afgewerkt middels een metalen of eiken rand, met of zonder profiel. De eiken randen kunnen in alle Satelliet beitskleuren worden gebeitst en hebben daarnaast een metalen detail rondom het glas.

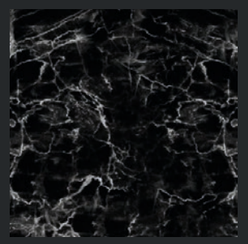

These table tops are made with an MDF core and a tempered glass top which is provided with a (personalised) print. As the personalised print is fired on the underside of the glass it lasts longer. The tempered glass is heat treated. This gives the glass its special properties and a permanent tension distribution. So, the glass it not harder, but stronger and safer. If broken, it breaks, it into tiny pieces instead of shards. The glass is also extremely stain resistant.

The edges can be finished with a Metal Edge or an Oak Edge that can be stained in any Satelliet colour, with or without an edge profile, and with a metal edge insert for extra detail.
