

### Stacking chair.

This chair with its traditional forms in thin metal and soft plastic is updated in a contemporary manner with a vintage touch. Its structure is in high strength steel ( $\varnothing$  20 mm), and characterized by tapering of the tube ends. The monochrome version is powder coated with epoxy paint, but is also available with a chromed frame. **The seat and back** is in recyclable polypropylene reinforced with fiberglass, available in 4 colours: off-white (7Y), black (7F), taupe (7U), and orange, (7T) which is also available in **fire retardant version** at an additional cost. In addition to the standard seat height, a stacking stool with 75 cm height is also available. **The glides** are in a recyclable, high strength plastic material.

A scratch-resistant spacer is provided to protect the seats when stacked.

**Stacking capacity** up to 6 pieces on floor, stacking on trolley + / - 20 chairs.
