

A new typology of storage units that represents a 3D innovation making a visual and functional use of the side section as well as the front one. Usually, the storage unit side view is never considered in terms of utilization, but for juxtaposition. The system consists either of column units, base units, stackable or hanging units.

Featuring large-sized compartments, divided in a functional way to receive and organise everyday objects, books, magazines or electronic equipment.

The system's flexibility is considerable: swivel modules, with drawers or large drawers, with flap opening door, stackable modular units or modular units to be flanked, free-standing or wall-mounted.

The elements can be highly customised: the open compartments as well as the rotary units may feature different materials and/or colours and can be newly varied by the customer even after their purchase.

## Typologies

All units are made of medium-density wood fibreboard (1.6 cm thick), varnished in matt white, 48 cm deep. They are divided into two main categories:

- **column storage units** with doors, 185.5 cm high, with a 2.5 cm plinth and adjustable small feet available in the following lengths: 34, 45, 53 cm. Only the L34 and L53 cm modules are equipped with an open rotary storage unit, made of medium-density wood fibreboard, 8 mm thick. Column storage units with rotary units are reversible vertically. The column with a single door features three internal shelves, one fixed and two adjustable (+/- 3 cm.) L53 columns with rotary unit and single door have been developed with five internal shelves, four fixed and one adjustable (+/- 3 cm) L34 columns with rotary unit and single door have been developed with four internal shelves, three fixed and one adjustable (+/- 3 cm)
- **low ground-resting storage units** (base unit), 32 cm high with a 2.5 cm

plinth and adjustable small feet; available in the following lengths 53, 85, 144, 203 cm.

- **low stackable storage units**, 32 cm high with a 1.6 cm spacer;
- **low hanging storage units**, 32 cm high, in length 53, 85, 144 cm; equipped with a kit for wall mounting. The low ground-resting and stackable storage units can be used in the middle of the room as well.

Low units are provided in the following configurations:

- C** - drawer with a one-piece front
- R** - downward flap opening with single door
- G/C\*** - 8 mm thick open compartment (G), and internal drawers (C)
- G/R\*** - 8mm thick open compartment (G), and (R) downward flap opening with single door
- C/C** - two-front large drawer and internal drawers (only in lengths: 53, 85, 144cm)
- R/R** - downward flap opening door and upward flap drawer (in length 85cm only).

## \*Electrified units

The **G/C** and **G/R** units\* in length 144 and 203cm (base, stackable and hanging units) are also available in the version arranged for cable management, with a white-lacquered

aluminium door (L8 D7 cm) on the top of the storage unit.

## Finishes

Units are always varnished in matt white; only open compartments and rotary compartments are available in the following options:

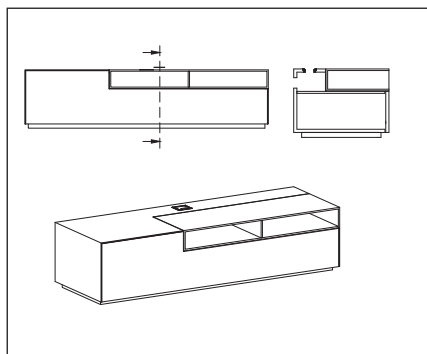

- matt white, green, orange, blue, sand, ivory, yellow and anthracite grey
- natural wood\* and natural grey wood\*
- frosted glass

\*Multilaminar wood composed of veneers based on precious woods such as ayous, poplar and lime.

The special manufacturing process allows to highlight the typical features of wood-types through creative aesthetic and customised figures. Environmentally-friendly and fully made of woods coming from forests and plantations managed following sustainability standards.

## Recommendations for composition

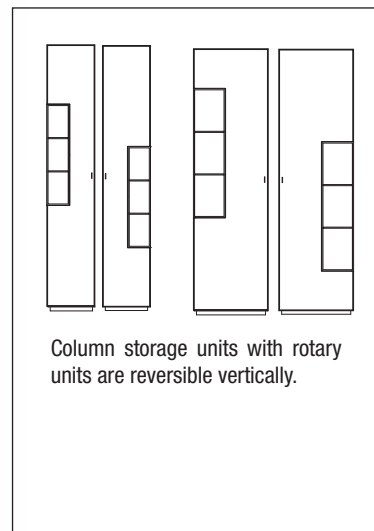

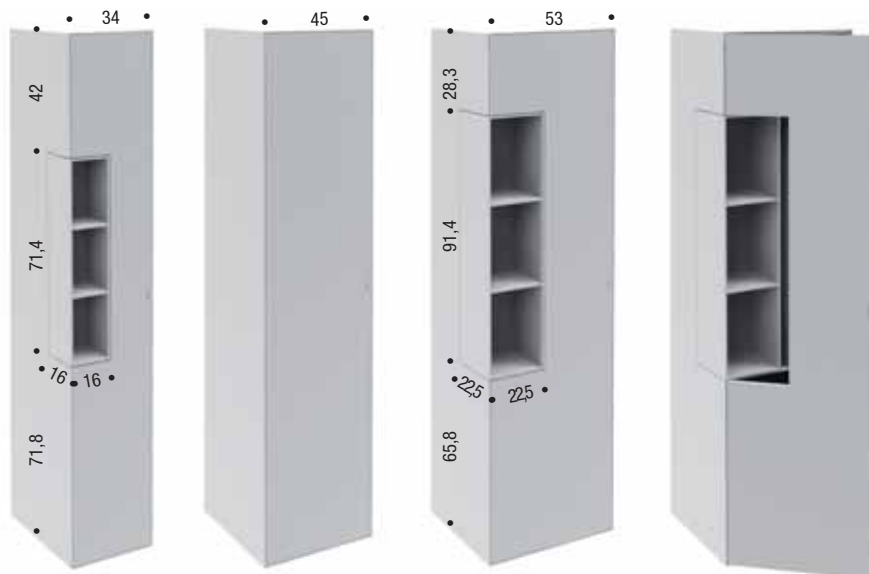

- column units with swivel storage unit must be flanked keeping a distance of 5 cm from one another to allow the open unit to rotate fully. Columns include an alignment kit. Moreover, such a distance is also an aesthetic feature of the project.
- on demand, a depth adjustment device can be ordered to be used between the columns (see page 16).
- feet allow for the adjustment of the column/low unit directly from inside the base
- we recommend to stack maximum four units (total height 135.3 cm)
- in the event of unit installation into niches, please contact our Sales Office to double-check dimensions.
