

ABOUT US

The world around us is changing faster than ever. People are “connected” while they work, while they travel and while they socialize. Different worlds merge into hybrid interiors. Old standards suddenly don’t apply anymore....

Devices have made us mobile and afford their users increasingly flexible activities which change at a faster pace than ever before.

Our philosophy is that furniture should optimally support these diverse activities, such as short notebook sessions or small group meetings, in an acoustically improved environment where mobile communication devices can be charged and connected to the network, and should also adapt to every environment, to every style.

Creating, manufacturing and promoting this kind of furniture is our business.

Welcome at Conceptual Furniture Design!

OUR DESIGN TEAM

DIRK RUTTEN
- DESIGN DIRECTOR

Born in 1970 in the Netherlands. Founder of the brand Conceptual, established in december 2016. Apart from the furniture design, he supervises the image of the brand, designs interiors of showrooms, trade booths and all the marketing materials including the product photography. As Design Director he is the creative force behind the brand.

Dirk Rutten started his art & design education at the Design Academy in Eindhoven, (the Netherlands) in 1988 and graduated in 1999 at the Hoge School v/d Kunsten in Utrecht (the Netherlands) as product designer. In between he studied in several countries abroad and before graduated for Fine Art in 1993.

In 1999 he started his independent design studio in the Netherlands and built his network of different companies all over the world. After working for many years for different furniture manufacturers, he built together with his business partners the current creative team that is responsible for our collection today.

The philosophy that ‘furniture should adapt to every style and any environment’ is still the leading principal our design vision is built on.

PETER KENIS
- DESIGN & ENGINEERING

Peter Kenis (Belgium 1968) graduated in 1993 as industrial designer from the Henry van de Velde institute of Antwerp. Besides for Conceptual, Peter Kenis works today as an industrial designer and mechanical engineer for several companies in different industries, such as medical technology, space tech and office furniture. His career as an independent engineer started in 2013. He collaborated in various furniture projects for different international clients. His added value is a strong technical background combined with a good feeling for design and aesthetics.

YSBRAND VAN DE VEEN
- 3D FILES & VISUALISATION

Ysbrand van Veen is involved with Conceptual since day one. Besides working for Conceptual he works as a creative multimedia designer for various world class brands. Ysbrand van Veen (born in 1980 in the Netherlands) graduated at the Hogeschool voor de Kunsten of Utrecht in 2002 and is working together with Dirk Rutten on a daily basis for more than 18 years. His multi skilled talent for 3D visualizations, augmented reality and VR technology makes him a unique designer for the essential marketing requirements of today. The independent multimedia design studio Ys-brand works for various industries like retail and e-commerce, marketing, entertainment, media and television.

FREDERIQUE VANHERCK
- GRAPHIC DESIGN

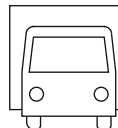

As until today her parents are running a successful furniture agency, Frederique Vanherck literally grew up between furniture. She studied at De!Kunsthumaniora in Antwerp and graduated in Audiovisual Design. After her higher education in Journalism and Digital Communication, she worked for several years as a Marketing Consultant for various companies in B2C & B2B. In 2017 Frederique started her own design studio named Concep’studio and works on a regular basis for Conceptual. The love for good stories and an eye for details sets Frederique apart from the rest!

WHAT WE DO

SERVICE

CONCEPTUAL is at your disposal and supports you in the day to day business with quotations and order administration, advice on specials, performant logistics and space planning, offering a complete set of 2D and 3D space planning tools and space planning advice. Fabric swatches can be sent on request.

LOGISTICS

With a weekly service with our own trucks, we serve the majority of our customer base guaranteeing quick lead times and avoiding the usual damages of consolidated transports. On request, we can support you with the assembly of the furniture at the place of installation.

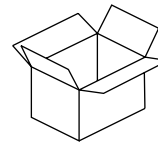

WARANTY

Our production plant is ISO 9001 and ISO 14001 certified and we dispose of a 20 year long experience in the field of upholstery, done by a team of more than 60 passionate employees proud of the high quality standard we manufacture for you. The ELEMENTS range is manufactured under license of Interior Unlimited International.

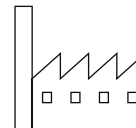

QUALITY CONTROL

CONCEPTUAL has set stringent standards in regard to quality control with a 100% check of the incoming materials, intermediate quality checks at each production stage and final quality control before packing, assuring that the overall build quality of the modules meets the high design standards.

WAREHOUSE

Besides the factory, CONCEPTUAL disposes of a warehouse in Geleen, The Netherlands. In order to reduce our ecological footprint to a minimum, we avoid packing material wherever possible, especially when we transport with our own trucks. Big project orders are sent in bulk packaging.

PRODUCTION

With CONCEPTUAL you will find a genuine one stop shopping partner as we don't only tell interesting stories but offer all services in one hand, from product design to space planning, commercial advise and last but not least production, logistics and after sales service. Our production know how allows us to react quickly and easily in case of customized product enquiries.

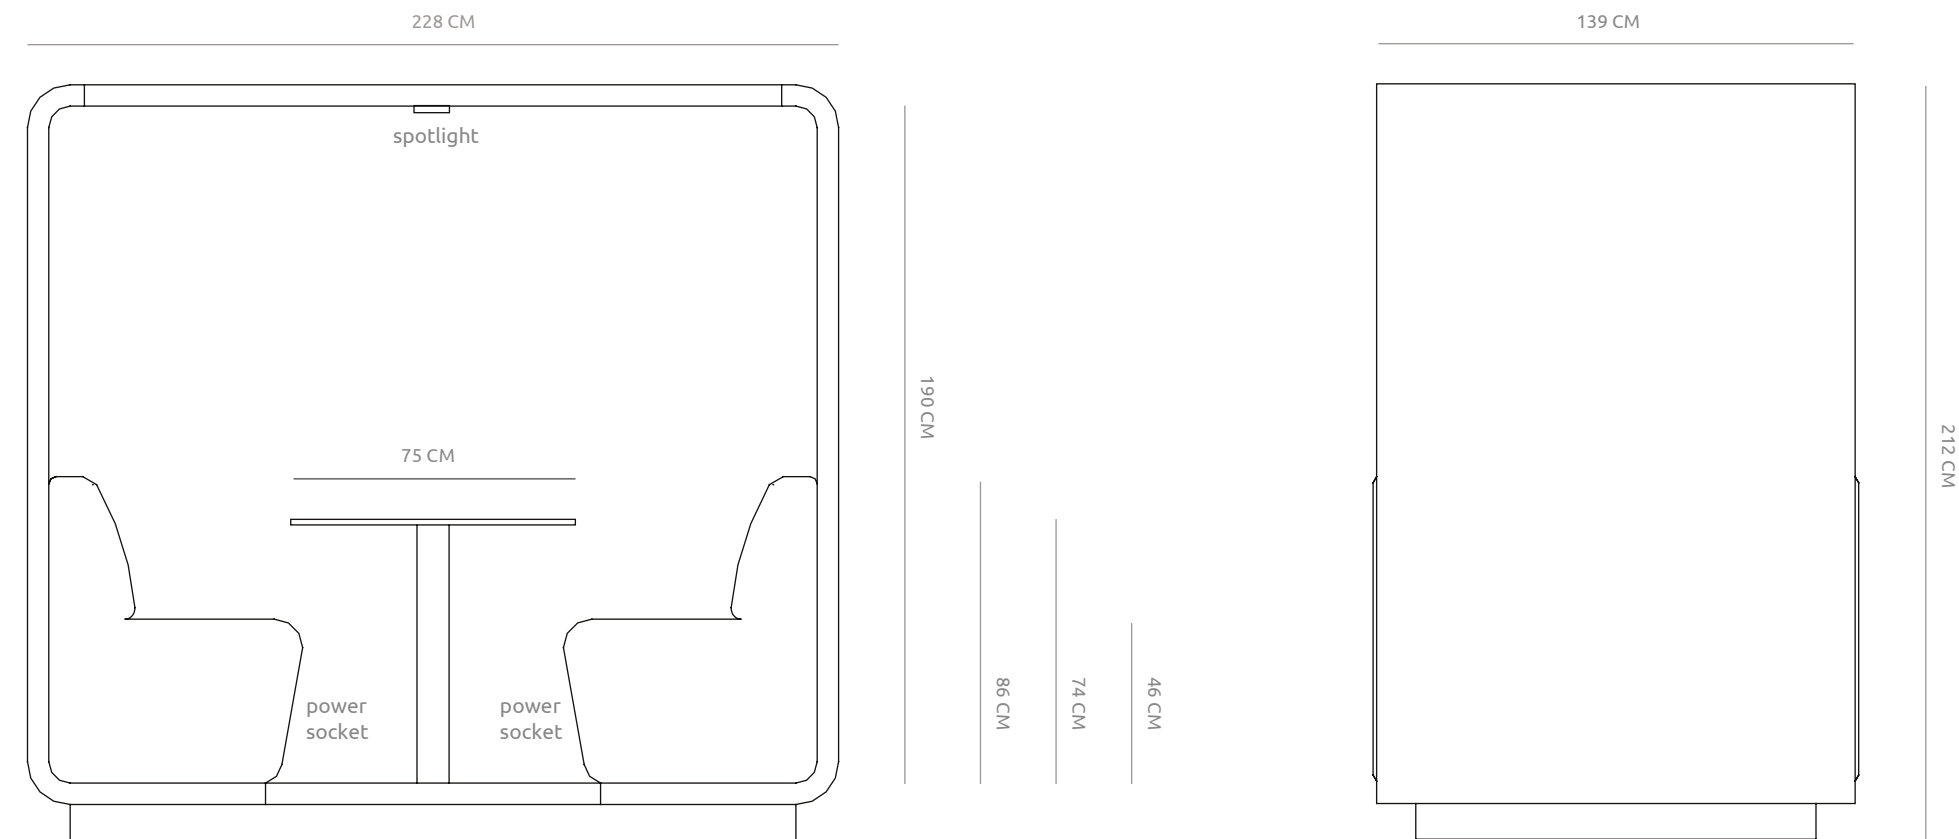

CABIN BOOTH

RETREAT AND DIALOGUE

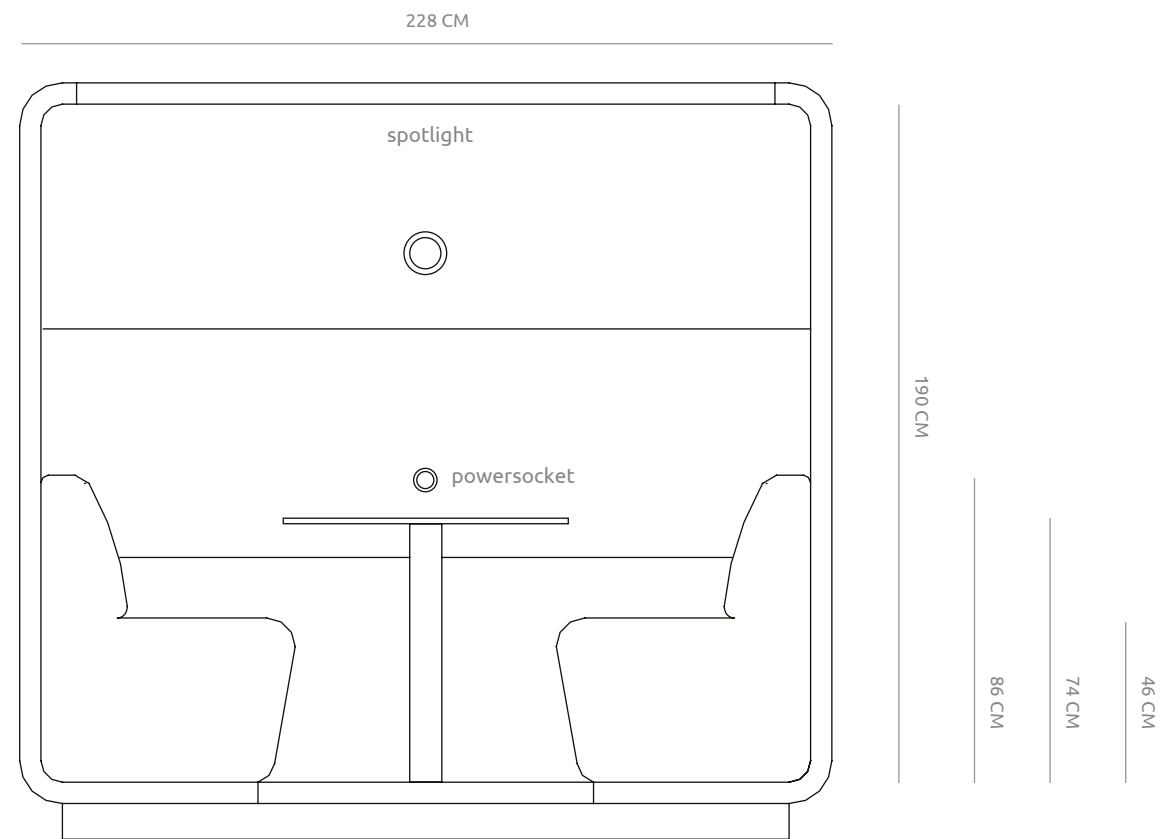

A successful flexible working space requires space for working and dialoguing in a sheltered environment. For this purpose we developed the CABIN BOOTH range with open, closed and wall integrated variants.

CABIN FREE STANDING

OPEN • CB-4FO-X-000-0

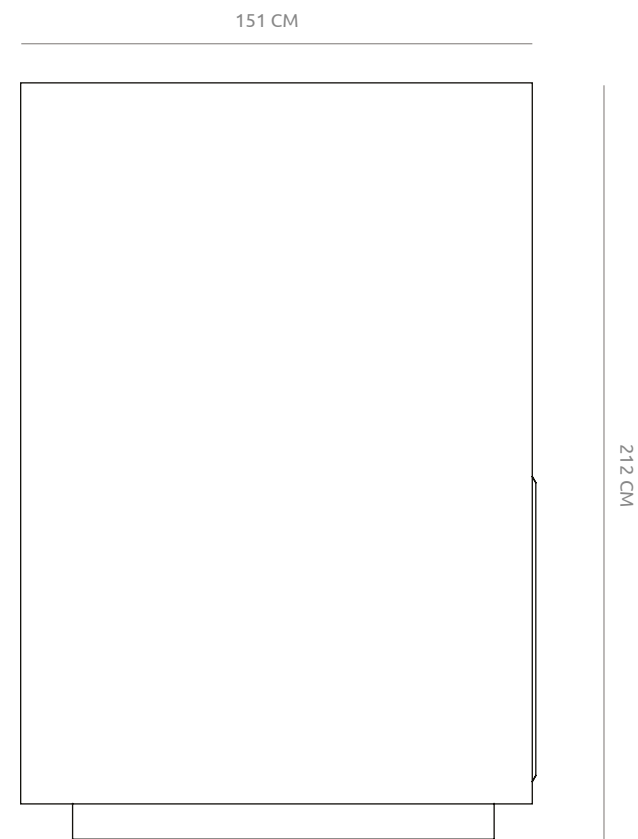

- Available with optional 3watt LED spotlight integrated in ceiling.
- Available with optional power socket + usb port integrated in front of seats.
- Table top 18mm thick available in different finished (see page 25).
- Steel columns, plinth and floor cover standard in powder coated black RAL 9005 and white RAL 9010 (other colours available on request, see page 24).
- Adjustable feet included.
- Knock down delivery. Installation time 30 mnts.

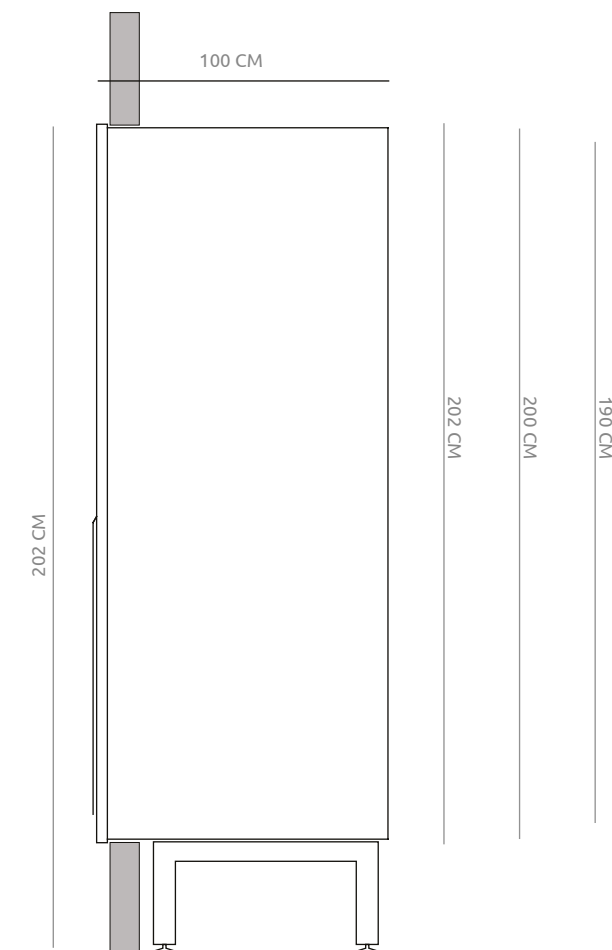

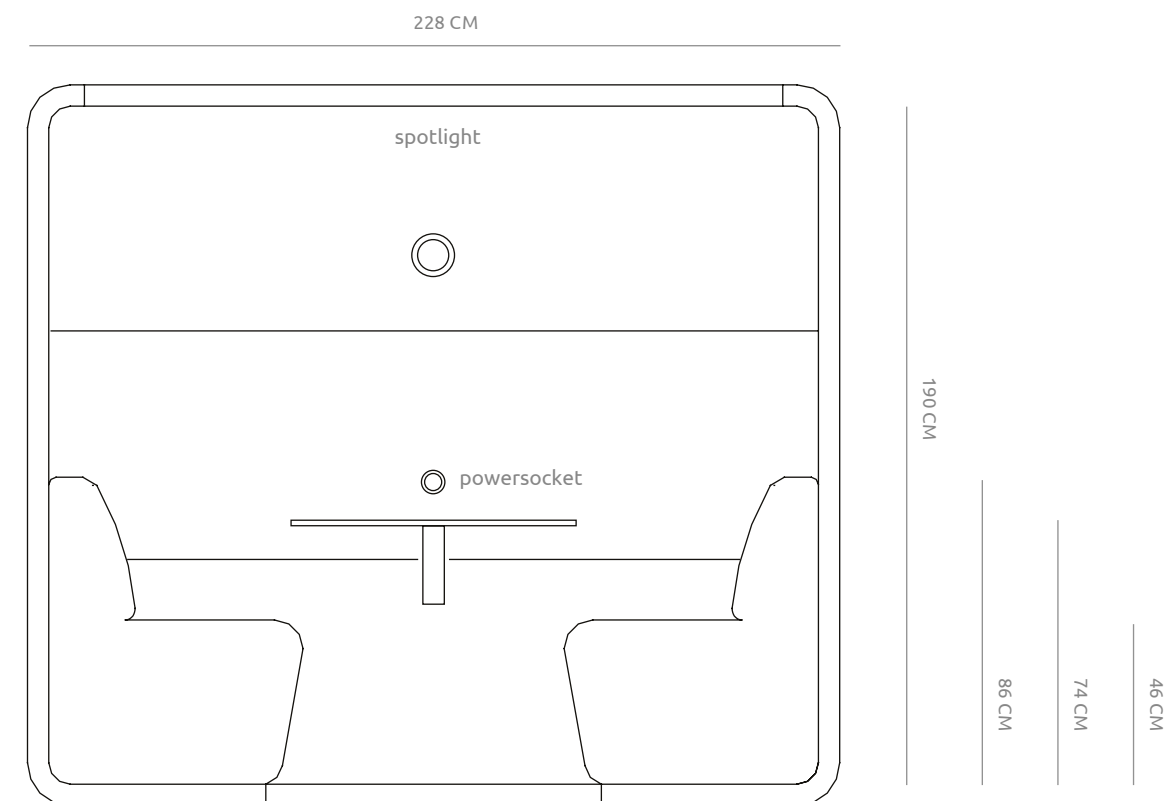

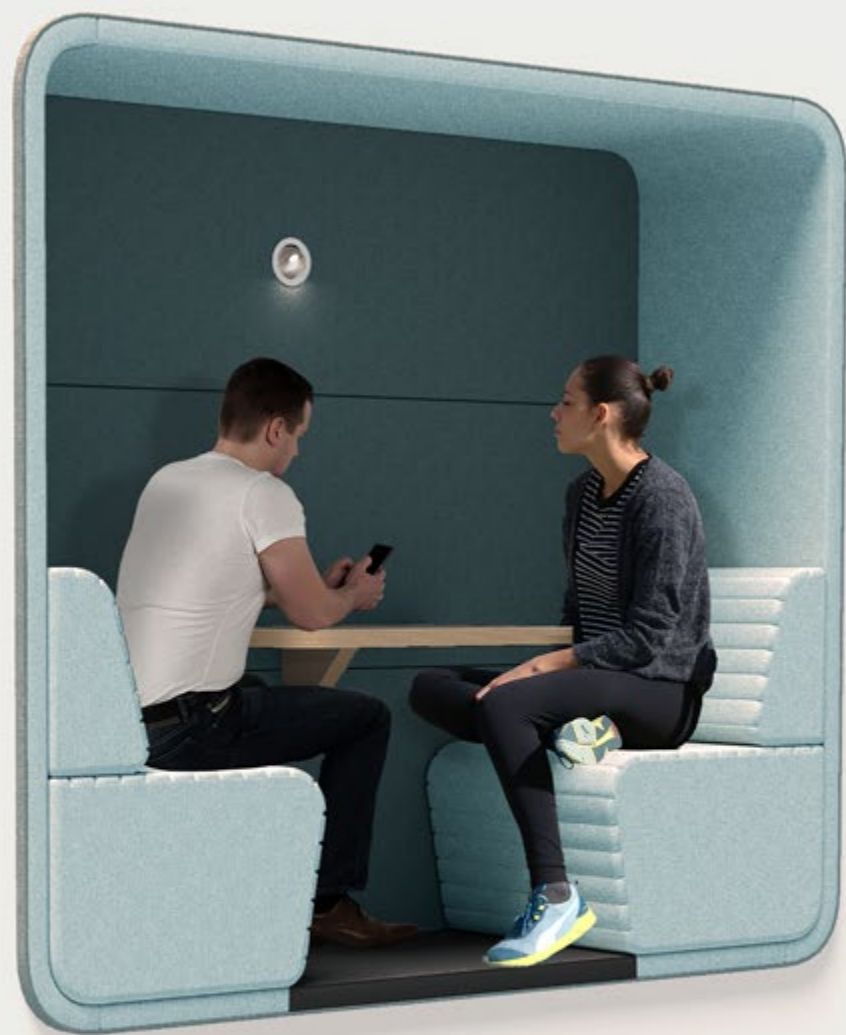

CABIN FREE STANDING

CLOSED • CB-4FC-L-000-0

- Available with optional 3watt LED spotlight integrated in back wall.
- Available with integrated LCD-screen on request.
- Available with optional power socket + usb port in back wall.
- Table top 18mm thick available in different finished (see page 25).
- Steel columns, plinth and floor cover standard in powder coated black RAL 9005 and white RAL 9010 (other colours available on request, see page 24).
- Adjustable feet included.
- Knock down delivery. Installation time 30 mnts.

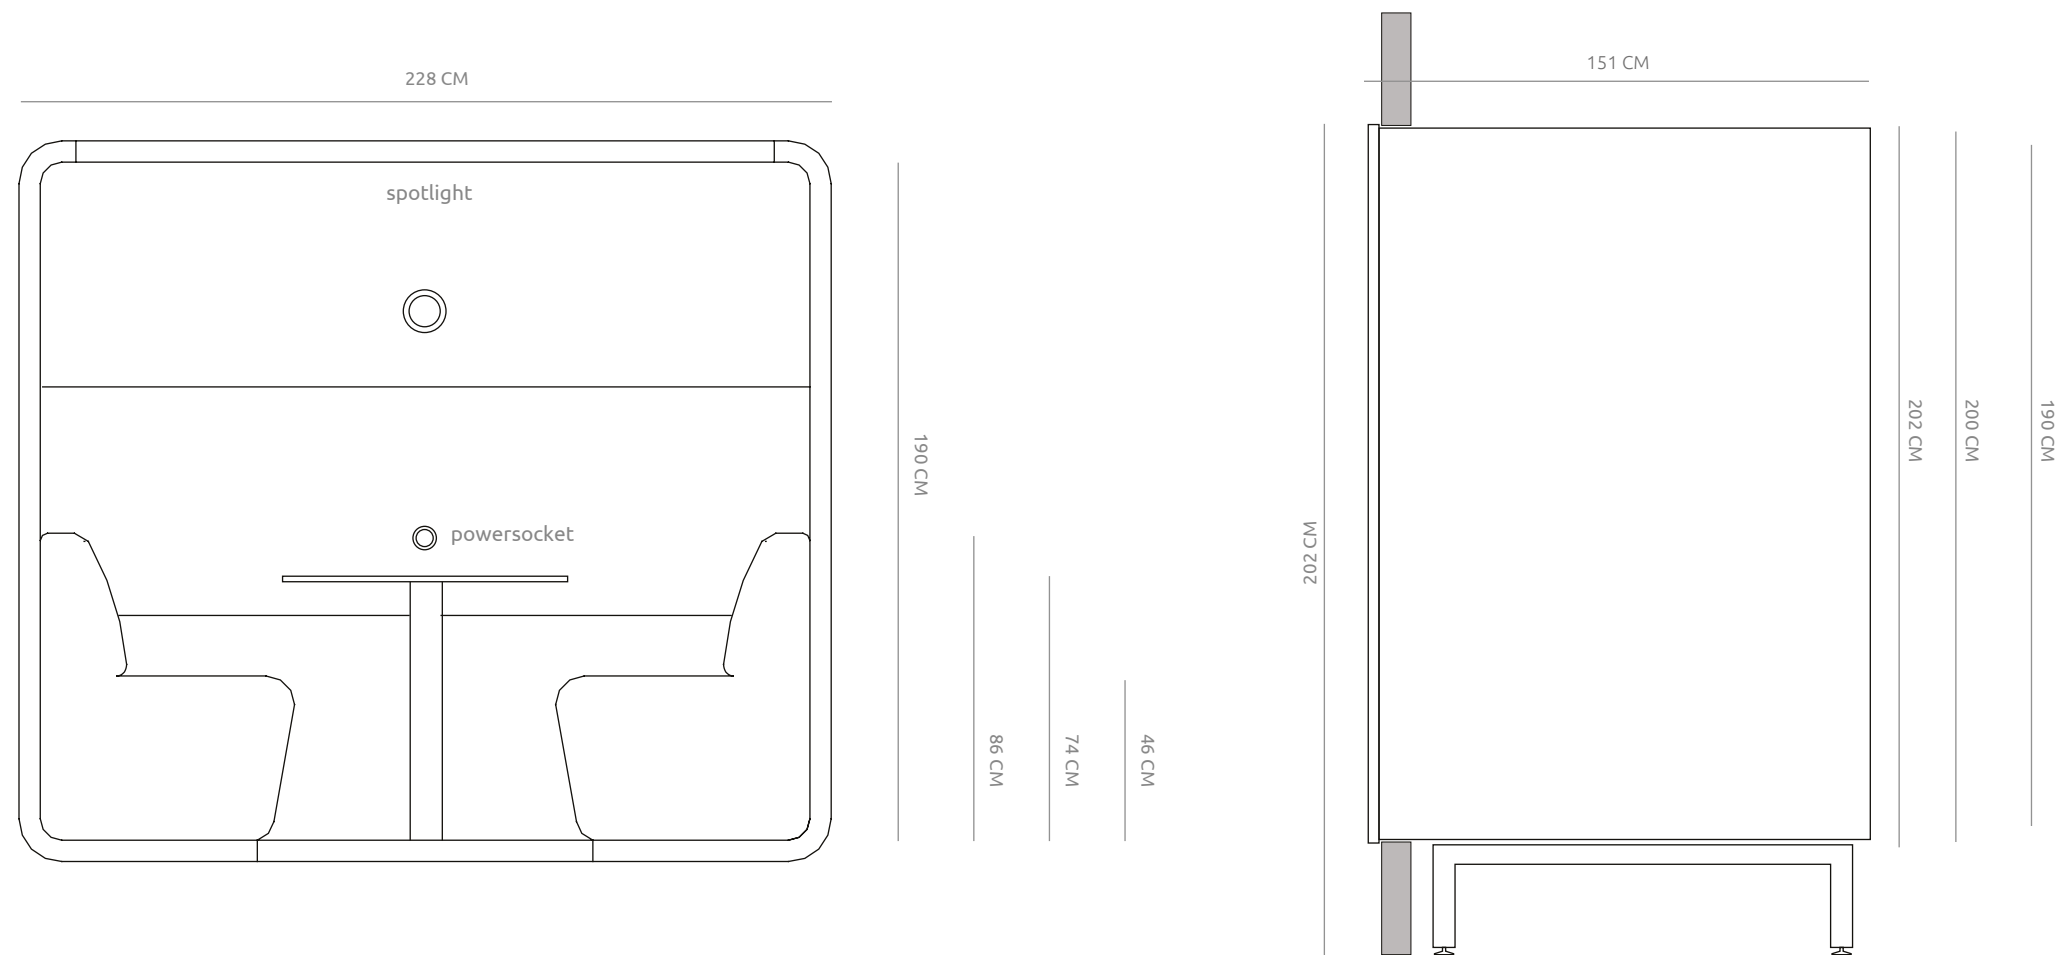

CABIN BOOTH

2-SEAT • CB-2BO-X-000-0

- Available with optional 3watt LED spotlight integrated in back wall.
- Available with integrated LCD mounting bracket on request.
- Available with power socket + usb port integrated in back wall.
- Table top 18mm thick available in different finishes (see page 25).
- Steel floor cover standard in powder coating black RAL 9005 and white RAL 9010 (other colours available on request, see page 24).
- Adjustable steel frame included.
- Knock down delivery.

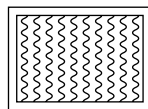

CABIN BOOTH

4-SEATER • CB-4BO-L-000-0

- Available with optional 3watt LED spotlight integrated in back wall.
- Available with integrated LCD-screen on request.
- Available with power socket + usb port integrated in back wall.
- Table top 18mm thick available in different finishes (see page 25).
- Steel column and floor cover standard in powder coated black RAL 9005 and white RAL 9010 (other colours available on request, see page 24).
- Adjustable steel frame included.
- Knock down delivery.

TECHNICAL SPECIFICATION

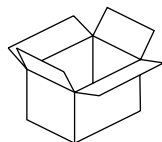

NOSAG SPRINGS

Inside the seats Nosag springs increase the comfort. These metal springs protect the quality of the surface because the flexibility of the foam on top will remain longer and wrinkles in the fabric will be avoided.

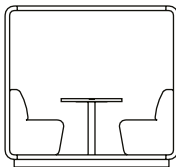

FSC CERTIFICATION

Conceptual and its production plant are FSC certified companies and operate with a network of FSC certified suppliers.

KNOCK DOWN TRANSPORT

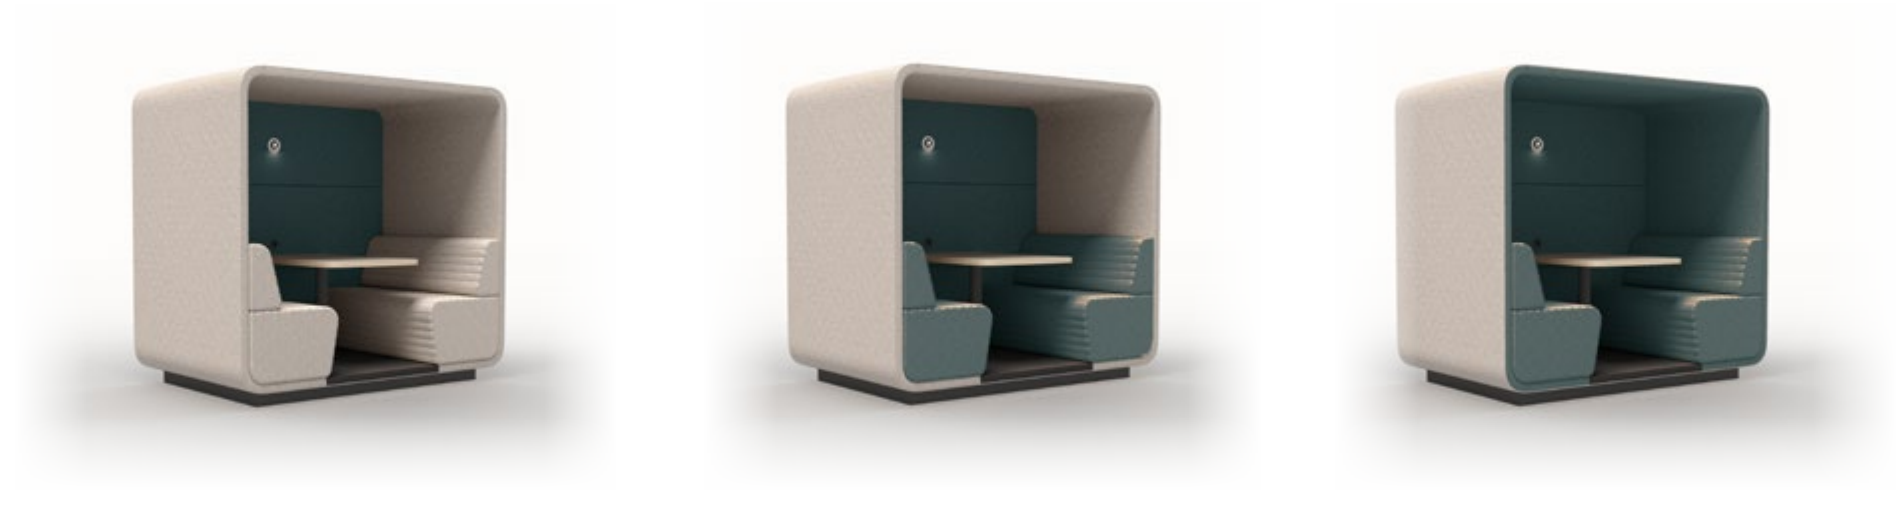

The CABIN booths are 'flat packed' in order to reduce the volume during transport and to guarantee they fit in the elevator. With special 'connection clickers' the different upholstered components can be assembled at location.

USE OF MATERIALS

The carcass is made of chipboard, plywood and flexible bent wood panels. The frame, floor cover and column leg is made of powder coated steel. The entire product is covered with different types of polyether foam.

UPHOLSTERY COMBINATION OPTIONS

back in contrasting colour

cushions and back panel in contrasting colour

entire inside in contrasting colour

- All the upholstery products of Conceptual are offered in 5 different fabric price ranges.
- All quotations will be based on these 5 ranges. Different fabric ranges can be combined for the same product.
- Special fabrics can be selected on request. For technical support contact our sales department.

OPTIONAL ACCESSORIES

SPOTLIGHT

Optional 3 watt LED spotlight • AC-SPT-X-000-0

- Rotation and tilting
- Integrated switch

ROUND POWER SOCKET

Optional round power socket • AC-PSR-X-000-0

- 1x power + 1x USB port
- Diameter 68 mm

SPECIAL POWER SOCKET

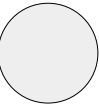

Power socket with flipper lid

- Length 257 mm
- 2x power + 1x HDMI port

POWDER COATING FINISHES

CLARK

FLEXIBLE ALL-ROUNDER

CLARK is our no-nonsense answer to the most diverse aspects of flexible working. With its straight, down-to-earth and efficient design and performant acoustics it offers a wide scope of solutions, from lounge to meeting pod. The optimal working top fit of the flip-top seater make it a full size working space in its own right. The stitched pattern in seats and backs prevent from wrinkling and make the range perfectly suitable for public areas. The sofa modules come with powder coated steel or solid oak legs.

ACOUSTIC SANDWICH SCREENS

With a height of 136 cm, the high screens of the CLARK seats offer a sheltered environment with optimum acoustics, ideally suited for concentrated work and informal meeting scenarios.

The sandwich construction made of 2 thin hardboard panels is filled inside with a thick layer of glass fiber. The sound waves created by people talking inside a CLARK meeting POD or having a phone call conversation inside a flip-top seater will be fully absorbed by the glass fiber inside the screens.

The sound waves can enter the glass fiber through the perforations of the inner hardboard panels. The outer hardboard panels will prevent these soundwaves to spread to the surrounding environment.

This benefits the user inside but also the rest of the people working in the same space at the same time.

DIMENSIONS HIGH & LOW

S-TUDIO

VERSATILE ELEGANCE

The elegant but restrained horizontal lining and the rounded edges of the S-TUDIO range contribute to the strong design language of this range. Especially the zig zag module is a unique proposition combining space economy with originality. The modularity is based on complete sofa modules, thus optically reducing the vertical seams. The 150 cm high modules offer optimum acoustics, especially in meeting pod configurations.

With its high quality detail finishing and accessories such as the armrest-integrated power/USB sockets, S-TUDIO offers aesthetically and functionally convincing answers for today's flex working requirements.

3-SEATER

ST-3SR-X-000-0 • 236 cm long / 73 cm wide

- Steel legs in standard black RAL 9005 and white RAL 9010 (special colours available on request).

STRAIGHT-SEATER 3

ST-3ST-X-000-0 • 180 cm long / 73 cm wide

- Steel legs in standard black RAL 9005 and white RAL 9010 (special colours available on request).

 POWER CUSHION
ST-PCN-L-000-0

Including:
• power socket
• 1x power + 1x USB port
• 2 meter cable

TECHNICAL SPECIFICATION

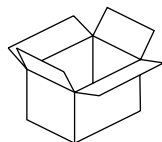

NOSAG SPRINGS

Inside the seats Nosag springs increase the comfort. These metal springs protect the quality of the surface because the flexibility of the foam on top will remain longer and wrinkles in the fabric will be avoided.

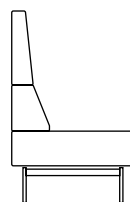

FSC CERTIFICATION

Conceptual and its production plant are FSC certified companies and operate with a network of FSC certified suppliers.

KNOCK DOWN TRANSPORT

The upper part of the backrest of the HIGH- & HIGH+ series are separated during transport to reduce the volume and can be mounted at location without the use of tools. The steel legs are separately as well and are easy to mount at the bottom of each module with 4 bolts.

USE OF MATERIALS

The carcass is made of chipboard, plywood and flexible bent wood panels. The legs are made of powder coated steel. The entire product is covered with different types of polyether foam.

UPHOLSTERY COMBINATION OPTIONS

- All the upholstery products of Conceptual are offered in 5 different fabric price ranges.
- All quotations will be based on these 5 ranges. Different fabric ranges can be combined for the same product.
- Special fabrics can be selected on request. For technical support contact our sales department.

ELEMENTS

UNLIMITED MODULARITY

ELEMENTS is our premium range and consists of some 80 different building blocks which are all part of a modular system. The different seating and integrated table elements can almost endlessly be connected and reconfigured, with integrated power and data supply and many interesting functional details in order to support activity based working in the best possible way..

ELEMENTS adapts to every environment, to every style and optimally supports diverse activities. The straight, square, corner and rounded seating modules can be easily connected, without the use of tools, and completed with the loose furniture elements, making the layout adaptable in the future and ensuring optimal use of the available square meters with plenty of room for creativity.

DETAILS

CONNECTORS

The different models of the ELEMENTS range have fully integrated connectors at one or both sides in order to connect them to the adjacent element. Each order will be based on a 3D drawing of the entire configuration in order to determine the amount of connectors that is required. Especially when the configuration is placed on a smooth floor, these brackets prevent the individual seating modules of the configuration from moving away from each another.

PLINTH OR WORKTOP

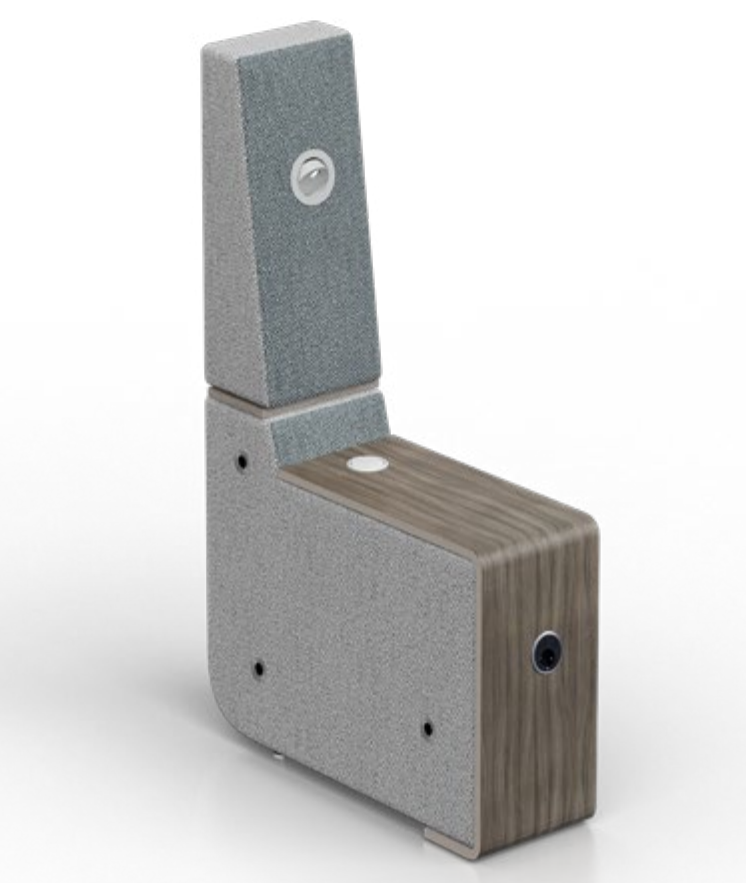

The backrests of all HIGH and MID modules are devided into two parts with a horizontal 18mm thick plinth in between. All elements with an intermediate plinth are also available with a worktop at the backside.

FABRIC SELECTION

Order processing requires indication of the inside and outside fabric type and colour of each element (or the entire configuration). Different colours and fabric ranges can be mixed. The fabric ranges are presented in 5 different price levels.

ADJUSTABLE FEET

All elements are provided with minimum 4 floor levellers allowing to adjust the height in case of uneven floors.

LED SPOTLIGHT

The HIGH versions of the CONNECT series have the possibility to integrate a round 3 watt LED-spotlight. Only the 30cm wide CONNECTING models can be equipped with this option. The light fixture is provided with a CE certificate and a 3 meter long power cord with plug. By tilting the spotlight by 180 degrees, the light will be switched off.

BUILT-IN POWER SOCKET

In the vertical surface of the covers (as well as upholstered backside and bridge panels), a built-in power socket can optionally be integrated. Besides the standard power sockets with one power socket plus usb port, other integrated options are also available on request, with more power sockets, HDMI-, data-, USB- and VGA socket options.

LACQUERED VENEER COVERS

The high quality wood covers of the CONNECT and BRIDGE models are made of bent plywood, laminated with lacquered veneer. The environmentally friendly coating avoids scratches in the surface. The 3 different colour options are indicated below and correspond to the colour options of the plinths and table tops, creating a uniformal look.

- including:
- polycarbonate shade diameter 350 mm, stainless steel pole 670 mm
 - light bulb 5 watt led, 2 m cable
 - switch integrated in fitting

TECHNICAL SPECIFICATION

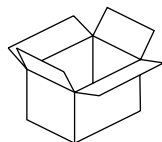

NOSAG SPRINGS

Inside the seats Nosag springs increase the comfort. These metal springs protect the quality of the surface because the flexibility of the foam on top will remain longer and wrinkles in the fabric will be avoided.

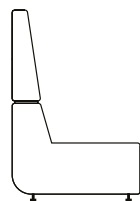

FSC CERTIFICATION

Conceptual and its production plant are FSC certified companies and operate with a network of FSC certified suppliers.

KNOCK DOWN TRANSPORT

The upper part of the high & mid series are separated and can be installed without the use of tools at location. With special 'connection clickers' the different upholstered modules can be connected at location.

USE OF MATERIALS

The carcass is made of chipboard, plywood and hardboard panels. Melamine plinths, in between covers, and brigde element in lacquered oak veneer.

FABRIC COLOUR COMBINATIONS

lower part in different colour

entire inside in different colour

top surface in different colour

- All the upholstery products of Conceptual are offered in 5 different fabric price ranges.
- All quotations will be based on these 5 ranges. Different fabric ranges can be combined for the same product.
- Special fabrics can be selected on request. For technical support contact our sales department.

EXTENDER

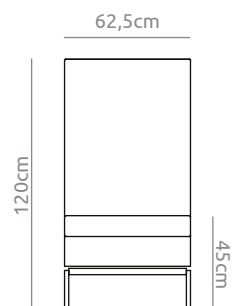

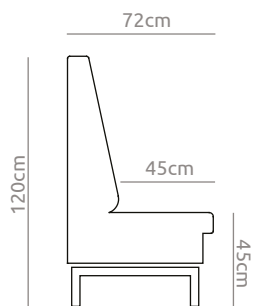

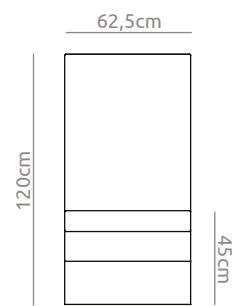

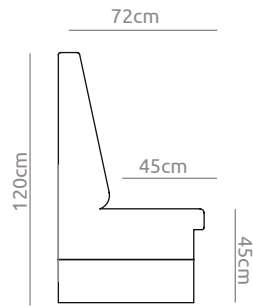

SEATS PER LINEAR METER

With its rock solid construction and water resistant plinth or powder coated metal legs, the Extender modular seating system is designed for public, educational and hospitality applications.

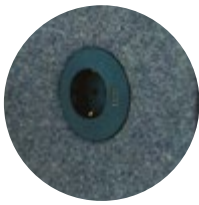

The range comes in 1 height, 3 standard lengths and different angle configurations, but different lengths and heights can be quoted on demand.

MEETING TABLE RANGE SPIDER

The intelligent SPIDER frame component kit is a real chameleon and enables to adapt to any meeting table size. The standard offering consists of 6 lengths, 5 widths and 2 heights and can be combined with the 4 different top finishes and 6 colours. Especially the shark nose variants perfectly match with the inclination of the tapered legs. The diameter of the round SPIDER variants has been conceived for 4 and 8 persons meeting tables.

LOOSE TABLES

COLUMN TABLES

Loose column tables versus integrated table solutions: both options are valuable, the first enabling an independent use of the tables separate from the soft seating, the second offering a plug and play environment for the activity based worker with integrated wire management.

Colum tables of 100cm or bigger with bigger 90mm diameter tube and bigger 640mm diameter floor base.

LAPTOP TABLES

The laptop table is the perfect soft seating companion and comes in 2 designs – round and rectangular – and 2 functional variants: fixed height 67 cm and adjustable height 47/67 cm.

The height adjustment is intuitive: the gas spring operated column locks in the lowest position and moves up to the highest position by simply pushing the top downwards in the lowest position.

MUSHROOM TABLE

Worktop and base of the MUSHROOM TABLES are made of one and the same material. The conic base is a composition of stacked round panels creating a unique texture in which the joint lines merge with the horizontal lines of the multiplex. The edge of the work top continues this horizontal pattern and makes the top blend together with the base. The mat surface of the Fenix lamination on top creates a beautiful contrast with the ridge texture of the base and edge. The weight of the base easily supports a 140cm diameter worktop, leaving plenty of leg space underneath.

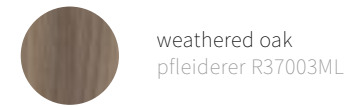

The MUSHROOM TABLES come in different heights and diameters. The edge of the work top and the base are lacquered with a transparent, ecofriendly coating.

- Pole stainless steel 100 cm long.
- Opal polycarbonate shade diameter shade 35 cm.
- Suitable for covers, bridges and table tops.

LOUNGE CHAIRS

LOUNGE CHAIRS

The CONCEPTUAL lounge chair collection is based on the same principles as the modular sofa systems. The lounge chairs come in different heights and all chairs are available with a wide range of fabric colours and floor bases with different finishes.

The name of the SHELTER chair explains the function of the high backrest with the acoustic 'ears' sticking out to create optimal acoustics and privacy. The backrest of TUB-XL is lower and the TUB variant has no extended backrest.

The different bases in solid wood, bent steel or aluminium are available in different finishes making the perfect combination with the selected fabric colour. The swivel option of the central column bases enables a 360 ° rotation, ideal for an open lounge setting of 2 or 3 chairs together with a matching side or coffee table.

FABRICS & FINISHES

FABRICS

Our collection comes in a vast choice of standard fabrics in five different price categories as well as PU leatherettes with natural leather grain, matching to the most diverse fields of application: from open office environments to public waiting areas such as airports, multi-purpose breakout areas, business lounges, hotel lobbies or food and beverage outlets and other informal locations. If you prefer your own fabric, Conceptual will be happy to advise you.

OUR FINISHES

All our fabrics, veneers, laminates and coatings have been carefully adopted to ensure a wide selection of colours, textures and detailed specifications for better use in commercial, hospitality, residential, educational and healthcare interior environments.

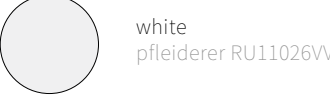

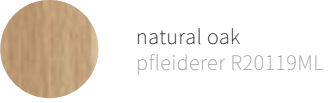

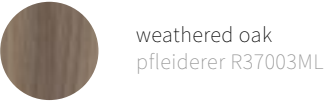

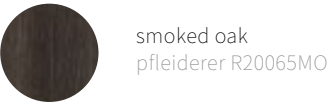

With an eco-drive ambition, our fabric and wood collections are environmentally sustainable, with high FR standards and abrasion results of the fabrics for safety and durability.

At CONCEPTUAL, the philosophy is to ensure that our furniture adapts to every environment and every style. It is by this motion, that our fabrics and other materials have been selected, providing solutions for all contemporary design requirements.

OUR FACTORY

OUR FACTORY

Our manufacturing plant with 70 fully committed employees is based near Wroclaw, Poland but is owned and managed by a Dutch family for more than 20 years.

A local network of suppliers makes it possible to manufacture a wide range of different products in the required short lead times the Western furniture market is demanding nowadays. Assembling of the wood carcasses and entire upholstery is done by our own staff. Steel parts and other components are made by factories based within a range of 50 km in order to ensure optimum flexibility and reduce our ecological footprint. Small hardware parts like spotlights, power sockets, chair bases and table legs are on stock in different colours and finishes.

Projects in the Benelux and Germany are delivered on a weekly base with our own transport and our Dutch warehouse in Geleen enables limited storage of products in case of a delay of the installation date. Customers can also collect goods from this address in the Netherlands.

Our factory is ISO certified and works according to today's manufacturing standards. Waste material is carefully separated per material category and recycled when possible. Old foam parts are shredded and used again for acoustic fillings. Fabric waste is collected and used for recycled fabrics. Carboard and plastic packaging is 100% separated.

Passion for making innovative high quality furniture that last long is our drive.

MATERIALS

Our material selection is a symbiosis of sophisticated fabrics, leather, steel, aluminium, laminates and wood veneers aiming at creating a cosy atmosphere in which the user can work, communicate and relax in the best possible circumstances whilst enjoying full functionality.

CRAFTMANSHIP

Our products combine high tech production processes (e.g. CNC manufactured carcasses guaranteeing a continuous high quality and accurate dimensions) with craftsmanship and love for detail on the finishing side with special focus on upholstery and bended wood elements.

UPHOLSTERY

As upholstery is our core business, we pay special attention to the finish of our seating elements, with e.g. the double radiuses on the bottom side of the ELEMENTS rounded corners and high quality stitching details. Combined with the high degree of modularity, this distinguishes our upholstered furniture from the mainstream soft seating products.

ORDER BASED PRODUCTION

Due to the wide scope of upholstery options and wood and metal finishes it is impossible to stock finished products but nevertheless our organisation allows a flexible and 'order based' production with competitive lead times.

CUSTOM MADE

Because our production is order based and our suppliers network is nearby, we can offer to customize our furniture when the quantities justify it, allowing you to optimally adapt your proposal to the specific project requirements. Feel free to contact our sales support team for more information about the possibilities.

VISIT OUR FACTORY

We are happy to invite you to witness the craftsmanship in our factory. If you don't have the time to visit us, please don't hesitate to ask us for a sample at your location before ordering the products. Please contact our sales support team for more information.

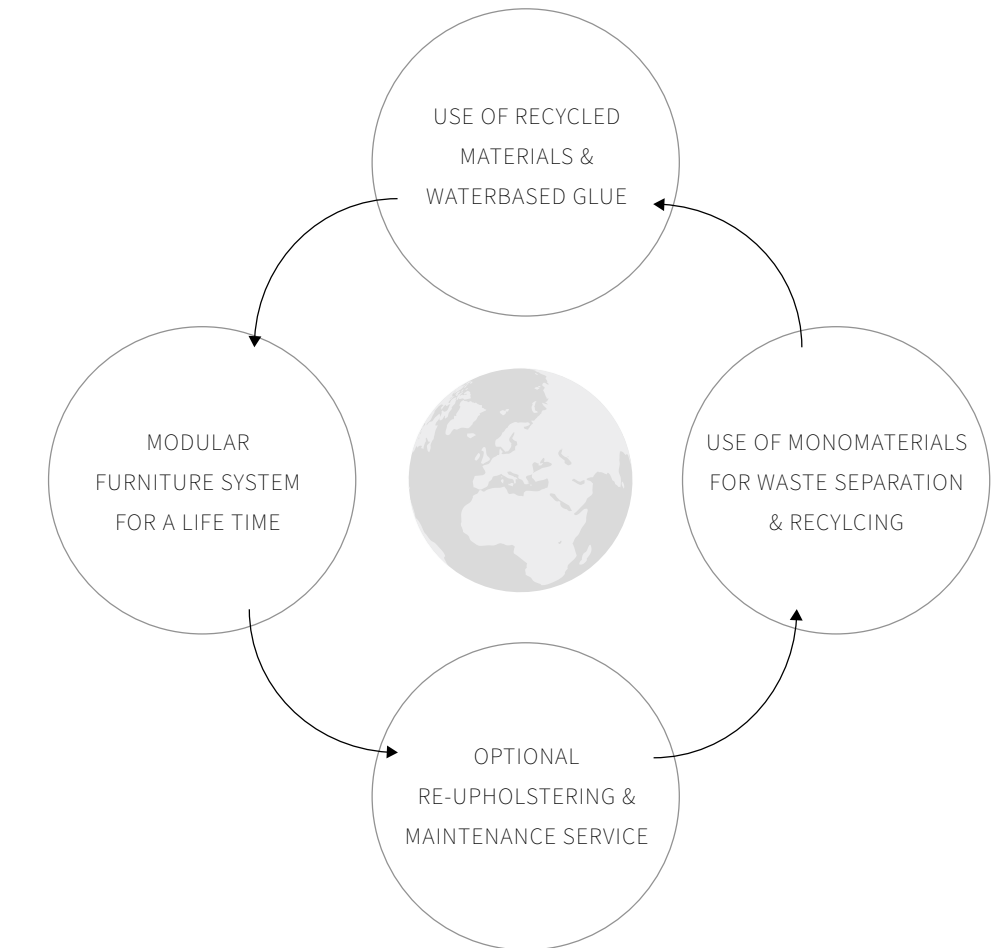

OUR ENVIRONMENT

At CONCEPTUAL we commit ourselves to sustainability, taking care to be environmentally conscious from the beginning to the end of our manufacturing process and offering compelling solutions for the end of life cycles issues.

Our company is FSC certified and our standard fabric range is 100% free of heavy metals. We use water-based glue and no PVC or nylon has been integrated. The polyether foam and the fabrics can be recycled and optionally be replaced by a biodegradable variant. The steel components come with a 30% recycled steel percentage.

On top of that, the product design facilitates selective, mono-material deconstruction and recycling of the furniture components at the end of their utilisation phase. The chipboard and plywood can be reused for similar applications.

Finally, the modular layout of the system facilitates easy reupholstery of damaged, worn or soiled fabrics and damaged subassemblies can be replaced at low cost with low environmental impact.

OUR POLICIES

ORDERING GUIDELINES

PRICE CONDITIONS

- All prices are ex VAT and in euro, based on a free delivery in the Benelux countries and central German warehouse, except for orders below £ 5.000,00 for which a surcharge will be invoiced.
- Delivery conditions for other destinations subject to prior written agreement
- Prices are valid until 31.12.2019.
- For orders based on specifications on request (e.g. special powder coating colour options), a minimum order volume of 20 products is required.

TERMS OF SALE

The payment conditions can vary per order. For dealers of Conceptual the payment condition is 30 days from the date of invoice for orders of £ 30.000,00 or less. For orders above £ 30.000,00 payment conditions are subject to prior agreement.

ACKNOWLEDGEMENT OF ORDERS

All orders will be acknowledged in writing to the customer with reference to the quotation made by Conceptual. Please contact our sales department as soon as possible if there are any amendments to your order. Conceptual cannot be held responsible for customer error or omissions. Once an acknowledgement has been sent, the order will go into production. Any amendment requests received after this date may be chargeable.

ORDERING PROCEDURE

Orders must be placed in writing and include the following:

- Product code with optional accessories and specifications.
- Fabric category, fabric range and colour code.
- Wood grain colour or lamination code for table tops, wood legs or lacquered veneer covers.
- Requested finishing of steel- and aluminium parts like chair bases etc.
- Quantity of products.
- Delivery address with name and phone number of responsible contact person at location.
- Desired delivery date (will be confirmed by Conceptual within 5 working days after date of order).

For orders including installation by Conceptual:

- A floor plan drawing with dimensions where to place the furniture.
- Dimensions of the elevator at location.
- Information regarding available parking spots for our truck(s).
- Information regarding access to the building.
- Possible time frame for installation.

Conceptual only offers installation services for orders in The Netherlands and Belgium based on a fee of 3% of the net order value. For orders in the south of Germany, France and other countries the installation costs may vary and are subject to prior agreement with the customer.

DELIVERY ADDRESS

Warehouse deliveries:

- Products will be delivered to the warehouse of the dealer under the condition that the truck can easily access the location without the need of a tail lift.

Project locations deliveries:

- Deliveries directly to project locations like offices are only possible under the condition that the truck can easily access the location, that the truck can be parked for the required time to unload the products and that the access to the building is within 100 meters of the parking place of the truck.
- The products will be delivered to the ground floor including packaging in case installation is not included in the sales agreement.
- For deliveries including installation of the products by Conceptual, all the packaging will be taken along by our installation people.
- For all deliveries the delivery document with summary of products needs to be signed after receipt.
- For all furniture installations done by Conceptual the dealer or customer needs to sign for approval of the installed furniture.

DELIVERY LEAD TIMES

- For orders of £ 30.000,00 maximum, all products will be delivered within 6 to 8 weeks under the condition that the selected fabrics are available in due time.
- For orders above £ 30.000,00 the lead time is subject to prior agreement.
- For orders with “specials” the lead time might exceed 6 to 8 weeks and therefore is equally subject to prior agreement.
- Please note that if the dates on your order acknowledgement do not meet your expectations, you should always contact our sales department team in order to explore potential ways to reschedule or improve the dates.
- Delivery is in addition to the lead times above and lead times begin once the order acknowledgement is issued.

WARRANTY

- Warranty is only valid if the goods have been paid for in full.
- Warranty and guarantee periods commence from delivery to site and are subject to fair wear and tear.
- Soft seating, meeting table ranges and service parts- products have a 5 year structural warranty and a 2 year warranty on upholstery.
- This is reduced to 3 year structural warranty and 1 year warranty on upholstery for more than 8 hour use environments.

EXCEPTIONS

- Any upholstery materials including COM, fabrics, leathers and vinyls and or any other surface coatings will be supported by the individual suppliers explicit warranty for that product.

EXCLUSIONS

- Any damage cause during onward freight or improper storage of the product, or damage caused by accident, and normal wear and tear.
- Any abuse, misuse, accident or improper use by the customer including sitting/ standing on tables or inappropriate handling when moving products.
- Any products or components not installed or configured correctly following Conceptual Furniture Design B.V. instructions.
- Colour variations - while every effort is made to ensure parity of colour, the company cannot guarantee an exact colour match on any painted metal finish or wood, or guarantee against commercial variance on fabrics, especially on repeat orders.
- Natural product changes - changes due to aging or exposure to light and naturally occurring markings, scarring and wrinkles in fabrics and leather.
- Unapproved modifications to the products carried out by the costumer or dealer.

- For more information about our registered Terms of Sales please check our website: www.conceptualfurniture.com/termsofsales

THIS LIMITED WARRANTY IS THE SOLE REMEDY FOR PRODUCT DEFECTS AND NO OTHER EXPRESS OR IMPLIED WARRANTY IS PROVIDED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. CONCEPTUAL FURNITURE DESIGN B.V. SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM ANY PRODUCT DEFECT.

DISCLAIMER

SPECIFICATIONS

All dimensions and weights are approximate whilst every care is taken to ensure their accuracy. Conceptual can not be held responsible for errors. Conceptual reserve the right to make, without noticed, any changes to materials, specifications or design of the products which it considers to be responsible or desirable. Such changes shall not affect the validity of the contract. Conceptual reserves the right to amend or change the pricing structure within this publication.

FABRIC SPECIFICATIONS

All products manufactured by Conceptual are upholstered and assembled to the highest standards. However, due to the characteristics and performances of certain fabrics the final appearance and finish on the product may be adversely affected by the fabric specified. Where a material is specified for a product which may have properties that do not meet the necessary requirements, our sales support team will contact you, advising you of any issues. If you decide to proceed with the chosen fabric, then Conceptual cannot be held responsible for issues relating directly to the material.
